Subject: RE: Gen/13/01052 Land adjacent Ben Hall, Hambeldon Road, Waterloooville

Richard I agree with Tracey's original comments and the Highway Authority's comments on the current application are:

The highway authority is looking at securing a shared use path along this side of Hambeldon Road, thus would be looking to have any new development of the land set back by a minimum of 2m to allow this.

The access has to be designed as a dropped kerb not a bell mouth design or similar due to the close proximity of the Charlesworth Drive junction.

The parking and turning on site seems adequate,

Cycle parking will need to be provided to HBC standard
