

From: FAO Traffic Team To: Development Services Manager

Thank you for the opportunity to comment on the proposals.

The traffic management team have no adverse comments regarding the proposals.

Having read the transport assessment I note that no mention to the additional volumes of traffic has been mentioned in regards to one of the main routes into Waterlooville from the A3 at Junction 3 – Hulbert Road. Hulbert Road is one of the principal routes into/out of Waterlooville.

The increase in traffic flows and road noise associated with vehicles visiting the site will add to the problems already raised by residents in the vicinity of Hulbert Road / A3 London Road roundabout and spur roads immediately adjacent to Hulbert Road.

We would ask that consideration is given the possibility of minimising the noise impact for residents from the increased number of journeys on Hulbert Road.

We would also request that should the internal roads be adopted by the Highway Authority that mechanisms are put in place to allow the Traffic Team request funds, in order to implement parking restrictions by means of Traffic Regulation Orders on the new or surrounding road networks, to minimise the possibility of obstructive and unsafe parking practices by visitors or staff of the units.

Kind Regards
