Hi Daph

Due to the nature / character of the site and the significant loss of Oaks in the area I would like to see a heavily weighted percentage of Oaks replanted in this area in the form of nursery standard size.

Where space is an issue then the Fastigate variety could be planted offering a column growth habit; elsewhere Pedunculate would be preferred.

I will leave the percentage mix to the clients Arb / Landscape Arc to come back with workable and comprehensive native mix weighted towards Oak as the significant species.

Thanks
J

Hi Jamie

Approval of Reserved Matters in respect to Plot 2 Phase 1 of outline application APP/15/00732 (new employment uses, hotel and access road) comprising construction of B8 warehouse and distribution building(18,037 sq m) to be constructed in 2 phases, with a maximum height not exceeding the 42m AOD contour (the design for plot 2 incorporating revision to previously approved parameter plan forming part of the Environmental Statement dated March 2012).

I understand you require some of the new planting to be oak – can you confirm what percent. In the meantime I will get details of the hedge to be remove.

Best regards
