Hi Ellen

I happy with the changes at 86 and 88 but not sure what you mean at no 90 please contact me back as it would be nice to get it done
Thanks simon

Hi Simon,

I have been out to visit the trees at 86 to 90 Greenfield crescent and believe there needs to be a few changes for the work within the application's.

At 86 Greenfield Crescent I am unhappy with the proposal to remove 3M from the height of the young Oak tree as I believe this would be too extreme for a tree of that size. Instead I would suggest to amend to 2M. I would also prefer a 3M reduction of the lateral branches of the large Oak at 88 rather than 4M. If you are happy with these changes please could you amend the work descriptions on your applications.

Also, the reductions recommended for the Ash tree at number 90 do not appear to unclear in relation to this specimen. Please can you advise on this one as the app may need to be withdrawn and resubmitted with more suitable works for this tree.

Thank you.

Kind regards, Ellen Roberts.
