From: Building Control

The application has been examined under the following areas where Building Regulations may impact on the planning application. In achieving Building Regulation compliance there may be a number of design solutions available and until a Building Regulations submission has been made it is not always possible to advise what, if any, changes may be required to the design.

The following areas have been considered:

Fire Brigade Access ✓ Solid Waste Storage ✓ Glazing (Positions, quantities, cleaning) ✓

Siting of building/structure ✓ Building over public sewers ✓ Flues | Other |

Please note no observations have been made in respect of disabled access. The DC Case Officer should discuss any access concerns with Building Control at the Access Surgery following assessment of the scheme using the access check sheet.

Observations:

Potential fire brigade access issues towards eastern end of the building
Waste collection should be consulted regarding size of refuse area
No public sewer in the area.
