Subject: RE: Merok House - Arboricultural Impact Assessment
Importance: High

Daphney

The supporting arboricultural evidence is comprehensive and outlined in the following points:

Minimal tree removal is required to facilitate development as well as a requirement for some tree pruning works to facilitate works.

The trees proposed for removal are all of low value and grading and most could have been removed for sound arboricultural reasons regardless of any redevelopment proposals.

Provided that the methodology prescribed in the AMS & TPP report is strictly adhered to and a site monitoring exercise is undertaken I would expect the retained trees to survive the development unscathed and to continue to grow on in the future.

Therefore I have no objections to this scheme in arboricultural terms.
