Note:

There are 16 spaces in the lay-by and 12 in the car park at the rear.

Of the cars parking in the lay-by several were there all day (see photos). The applicant indicates that these belong to local residents.

Only one delivery vehicle was noted at the premises. This was a transit-type vehicle and delivered to the front of the premises.

At no time was there a problem parking in the lay-by. The cars parked in the road appeared to be associated with neighbouring residential properties.
