

Dear Daphne,

Please take this email as a holding objection from the Conservancy to APP/16/00195.

The true extent of the dwelling's height, versus the silhouette of the existing structure cannot be accurately computed, owing to the lack of a topographical survey, but it would seem the guidance of extensions/replacement dwellings in the AONB is exceeded, and a harmful overdevelopment would result adversely affecting the setting of the AONB.

Yours sincerely

Steve Lawrence MRTPI
