Subject: APP15/00420 - 9 St Georges Walk, Waterloooville (EH Comments Re: Contamination)

Richard,

Comments as previously on this site - some potentially contaminating landuses on adjacent land, and an uncertain history at the site. No objections, probably a low risk, but I'd request a standard ground contamination condition to ensure that there are no unacceptable risks to future occupants. See attached for a more detailed rationale.

Best Regards,

Jon
