

57 Frogmore Lane, Waterloooville
APP/15/01145

Hi David,

After our site visit to 57 Frogmore lane I would like to raise concern about the proposed plans for the garage under the existing sycamore tree in the neighbouring garden. It would be unsuitable for such construction to be placed in the area plotted on the plan due to the damage that it would have on the root system if traditional construction methods are used.

With regards to this, I would suggest moving the proposed garage to the left side of the garden to give a clearance and avoid causing implications to this tree.

Apart from said issue, I have no other initial concerns about the developments plans at this site however an AIA, AMS and TPP will be necessary.

Regards

Ellen
