

Dear Mr James,

Following on from our Development Engineer's direct comments to you, he has also provided comments with regards to your revised layout. Please could you seek to address all his concerns. I am aware that you have been in discussions with him to seek to do this.

#### Comments

I expected to see any proposals on an updated surveyed layout of the buildings and the curtilage of the site ,which would show the increase in size brought about by effect of the recent Aston Road 278 works.

In general, where is the servicing for the two units/extension? (what happens to the traffic flow if a unit is being serviced) and I need the overlays that I asked or to ensure that vehicles can turn the "corners". Are there to be gates if so how do spaces 1,2 and 9 work. I want to see the whole thing including the solutions to my comments on a plan so that it can all be conditioned.

The Travel Plan is a bit weak it could mention loans for cycles etc. and appointment of a travel coordinator

Kind regards  
Heather
