Sally,

Thank you for your email regarding the above site.

We had no bespoke comments to make to the application as submitted in August/September 2014, so we will not be reviewing this document.

The proposed development does fall within Source Protection Zone 1, but as the development is going to mains, we have no bespoke comments to make as there will not be infiltration to ground.

Pollution Prevention

We recommend the incorporation of pollution prevention measures to protect ground and surface water. We have produced a range of guidance notes giving advice on statutory responsibilities and good environmental practice. This includes Pollution Prevention Guidance Notes (PPG's) for the specific activities listed below. Pollution prevention guidance can be viewed at:

<https://www.gov.uk/government/collections/pollution-prevention-guidance-ppg>

In the event of a pollution incident, all works should cease immediately and the Environment Agency should be contacted via the incident hotline 0800 807060.

Should you have any further queries, please do not hesitate to get in touch.

Kind regards,
Verity
