1. Introduction

1.1 Background

In July 2007 Mott MacDonald carried out traffic surveys at six established Churchill Retirement Living (CRL) sites across the south-east of England. The 2007 survey was undertaken to identify the parking trends and vehicle trip generation associated with each of the lodge developments. To inform the 2007 study, Automatic Traffic Count surveys (ATCs) were installed over a seven day period to record traffic movements into / out of the car parks.

With this previous survey information being five years old, a new study has been commissioned to update these findings. The 2012 surveys were specified to identify parking accumulation and trip rates at eight sites across the south east of England. The eight sites are:

1. Acacia Lodge, Fareham
2. Andrews Lodge, Lymington
3. Blenheim Lodge, Amersham
4. Llewelyn Lodge, Bexhill-on-Sea
5. Mottisfont Lodge, Romsey
6. Queen Elizabeth, Cliftonville
7. Tyrell Lodge, Chelmsford
8. Worthington Lodge, Hythe, Kent

The 2012 surveys were completed on a single day at each of the Lodge sites, and were undertaken by count enumerators and using video analysis. This methodology was adopted as it produces more accurate results as compared with the ATC approach (as used in 2007). The enumerators recorded the number of vehicles arriving and departing to/from each site, the number of parked vehicles within the site at the beginning and end of the survey period, and in addition, any on-street parking activity associated with the Lodge development.

The results of the 2012 parking surveys for each site are presented in Section 2, with Section 3 detailing the trip rate. A summary is provided in Section 4.

2. Parking survey results

2.1 Introduction

Car park surveys were carried out at each of the eight CRL sites on a neutral day (Tuesday or Wednesday or Thursday) in a neutral month (May) in 2012 over 12 hours (0700-1900).

In order to improve accuracy as compared with the ATC approach, an enumerator was based on site for the duration of the survey counting vehicular movements into / out of the car park. In addition to the recording of on-site car parking activity, on-street car parking associated with each Lodge was noted; the results of which can be found in **Section 2.2** below. In order to determine parking accumulation, the number of vehicles parked at the beginning and end of each survey was recorded.

In **Section 2.2** below the survey results are presented showing the on-site parking demand and also the total parking demand, including any on-street parking that is associated with the Lodge. The full results of all of the car park surveys can be found in **Appendix A**.

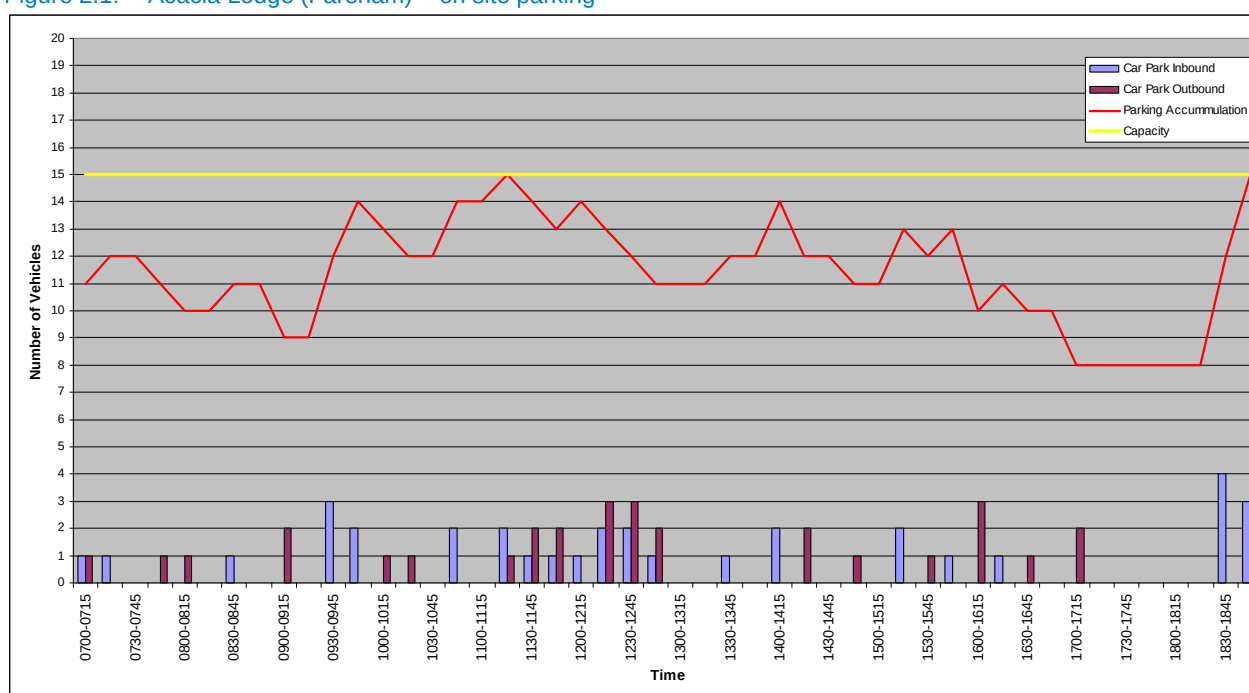

2.2 Results Summary

2.2.1 Acacia Lodge (Fareham)

Located at Trinity Street, Fareham, CRL has confirmed that Acacia Lodge is fully occupied, with all 46 apartments sold. There are 15 car parking spaces providing a ratio of 0.33 on-site spaces per residential unit. It is understood that 10 residents own a car. .

The surveys were carried out on Tuesday 1st May 2012, 11 cars were recorded parked on the site at 0700 and 13 parked cars were recorded at 1900. **Figure 2.1** below shows the on-site car parking results.

Figure 2.1: Acacia Lodge (Fareham) – on site parking

The results presented in **Figure 2.1** show that the maximum capacity (15 vehicles) was reached on two occasions; during 11.30-12.00 and 18.45-19.00. It should be noted that although 13 cars were recorded at the end of the survey, two light goods vehicles were parked, taking the car park to full capacity.

There was no on-street parking activity recorded at this site.

2.2.2 Andrews Lodge (Lymington)

Located at Tylers Close, Lymington, CRL confirmed that Andrews Lodge is fully occupied, with all 35 apartments sold. There are 11 car parking spaces providing a ratio of 0.31 on-site spaces per residential unit. It is understood that 8 residents own a car.

The surveys were carried out on Wednesday 2nd May 2012, there were eight cars parked within the car park at 0700 and eight cars parked at 1900. **Figure 2.2** shows the on-site parking results below.

Figure 2.2: Andrews Lodge (Lymington) – on site parking

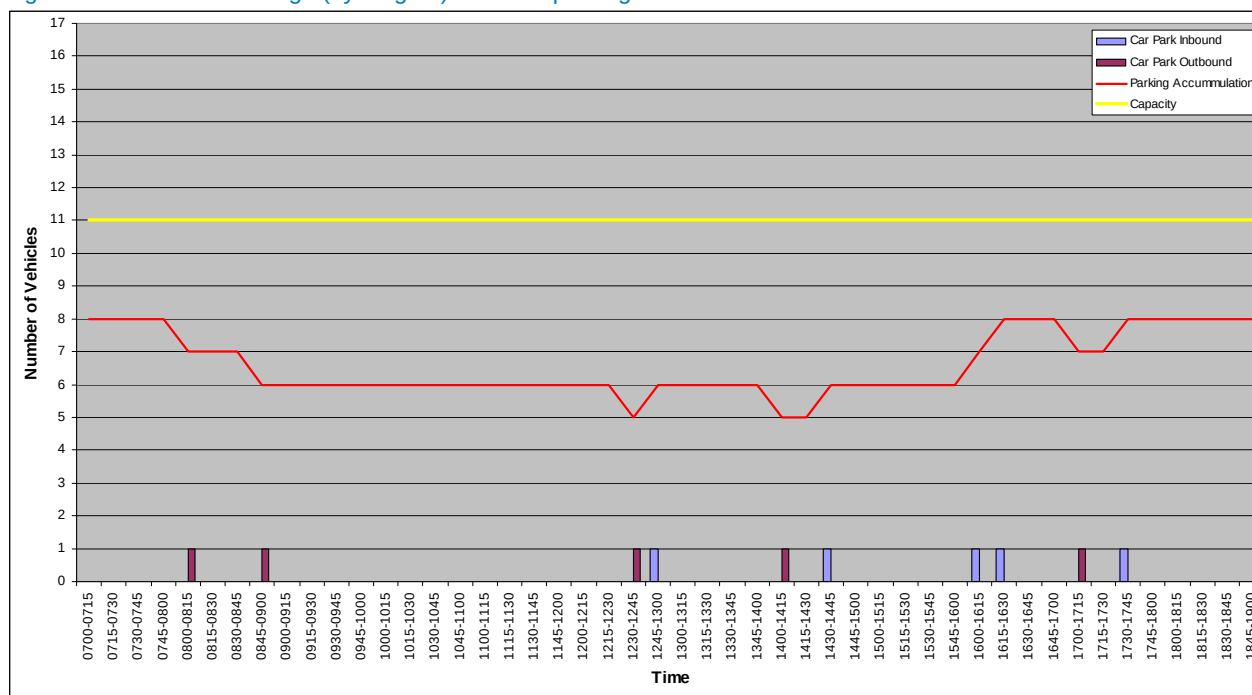

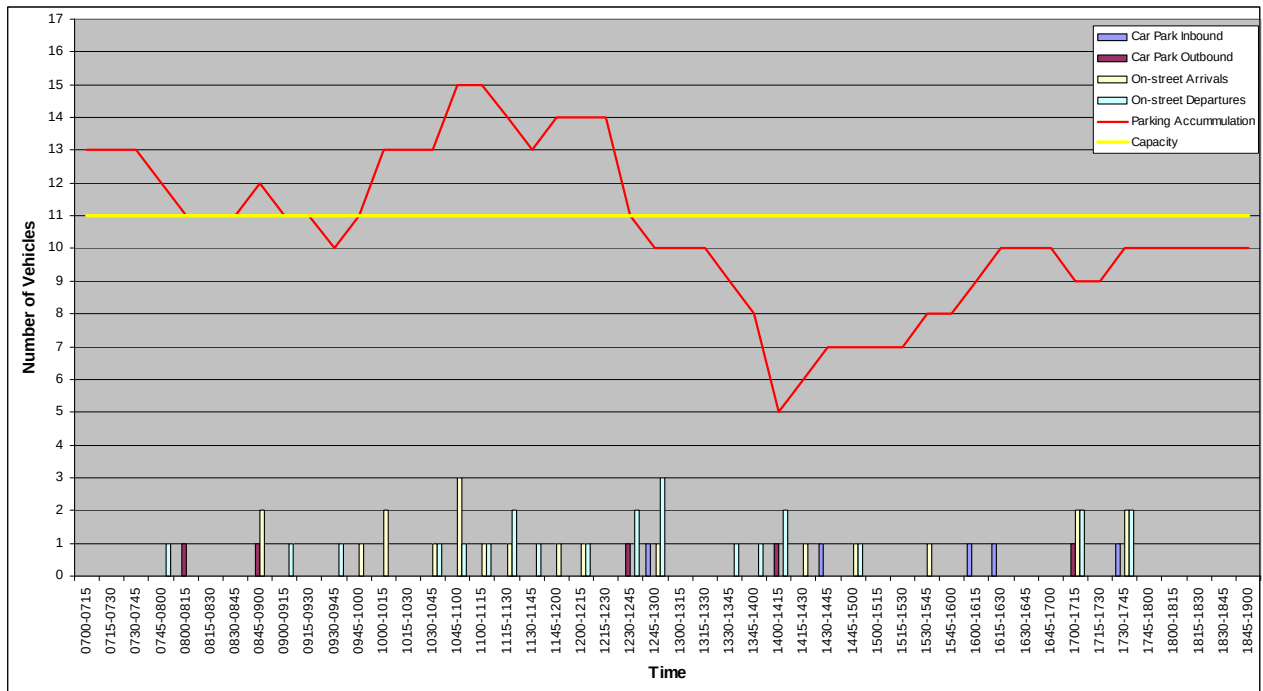

Figure 2.2 shows the car park did not reach its maximum capacity of 11 vehicles at any point during the survey period.

The graph shows three instances where eight vehicles were parked, which was the highest recorded value. It can be seen from the burgundy and purple bars that there were only a total of 10 occasions when cars left or returned to/from the site. On further investigation, the enumerator observed that as Andrews Lodge has a cul-de-sac access road which passes the front door, it appeared more convenient to park on the access road, rather than drive round to the rear of the site which is where the car park is located.

Figure 2.3 reaffirms this observation, with the yellow and green bars showing all arrivals and departures, including those on-street.

Figure 2.3: Andrews Lodge (Lymington) – total car parking

The on-street parking activity has implications for total parking associated with Andrews Lodge, as it can be seen in **Figure 2.3** that on the day of the survey, total parking accumulation exceeded maximum capacity. The site parking capacity (11 vehicles) was reached and exceeded for much of the AM period. However, during the afternoon the number of parked cars on-street was significantly lower and the site capacity was not exceeded for the remainder of the survey period.

2.2.3 Blenheim Lodge (Amersham)

Located at Chesham Road, Amersham, CRL has confirmed that Blenheim Lodge is fully occupied, with all 30 apartments sold. There are 9 car parking spaces providing a ratio of 0.30 on-site spaces per residential unit. It is understood that 6 residents own a car.

The surveys were carried out on Thursday 3rd May 2012, there were eight cars parked at 0700, and seven cars parked at 1900. **Figure 2.4** shows the on-site parking results below.

Figure 2.4: Blenheim Lodge (Amersham) – on site parking

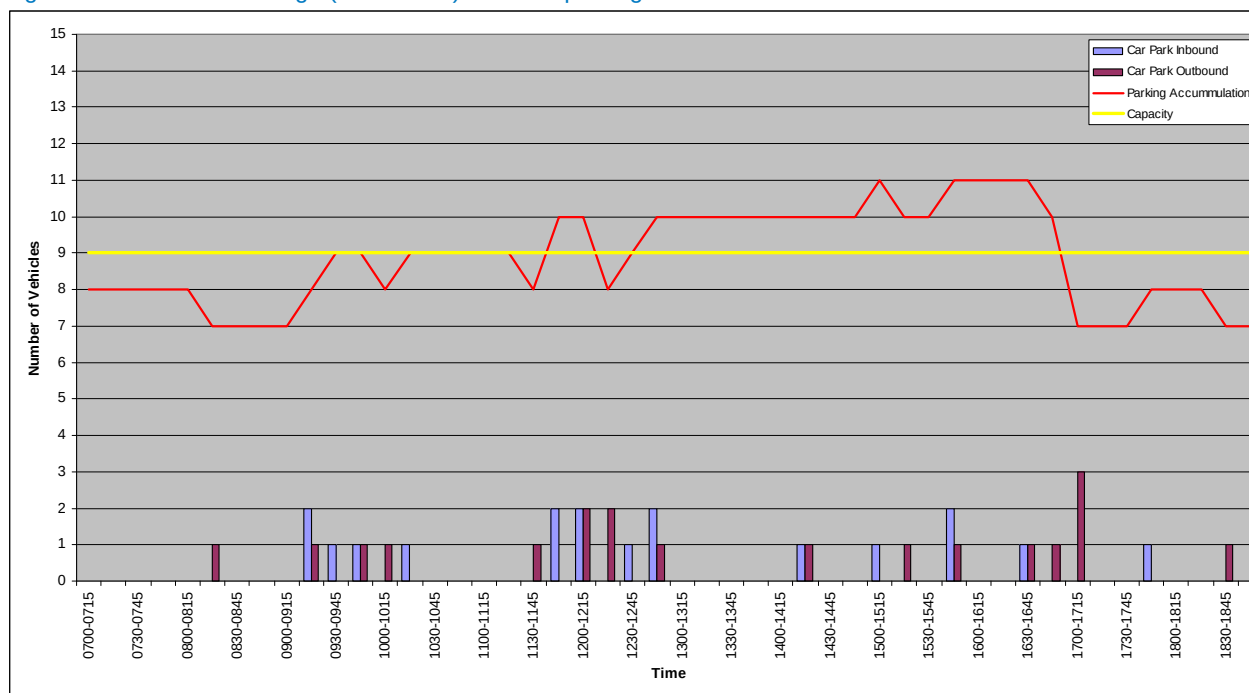

Figure 2.4 shows that on the day of the survey, the main car park at Blenheim Lodge exceeded capacity (nine vehicles). It can be seen that the car park reached maximum capacity at 0900, with this continuing through to 1145 when it then exceeded capacity until 1700. The results would suggest that on the day of the survey, parking provision was inadequate and that some “double parking” would have occurred.

There was no on-street parking associated with Blenheim Lodge; the road immediately outside, Chesham Road (A416), has double yellow lines prohibiting parking.

2.2.4 Llewelyn Lodge (Bexhill-on-Sea)

Located at Cooden Drive, Bexhill-on-Sea, CRL confirmed that Llewelyn Lodge is fully occupied, with all 48 apartments sold. There are 16 car parking spaces providing a ratio of 0.33 on-site spaces per residential unit. It is understood that 16 residents own a car.

The surveys were carried out on Thursday 3rd May 2012, there were 14 cars parked at 0700 and 14 cars parked at 1900.

Figure 2.5 below shows the on-site car parking results.

Figure 2.5: Llewelyn Lodge (Bexhill-on-Sea) – on site parking

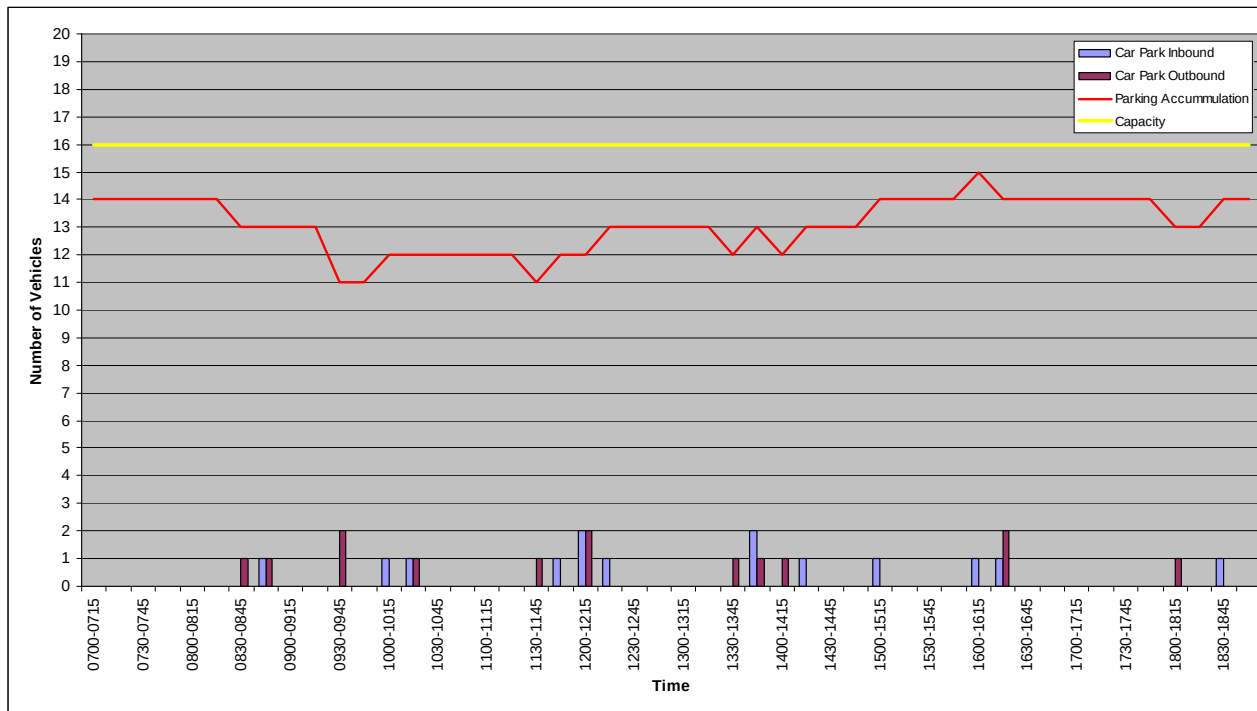

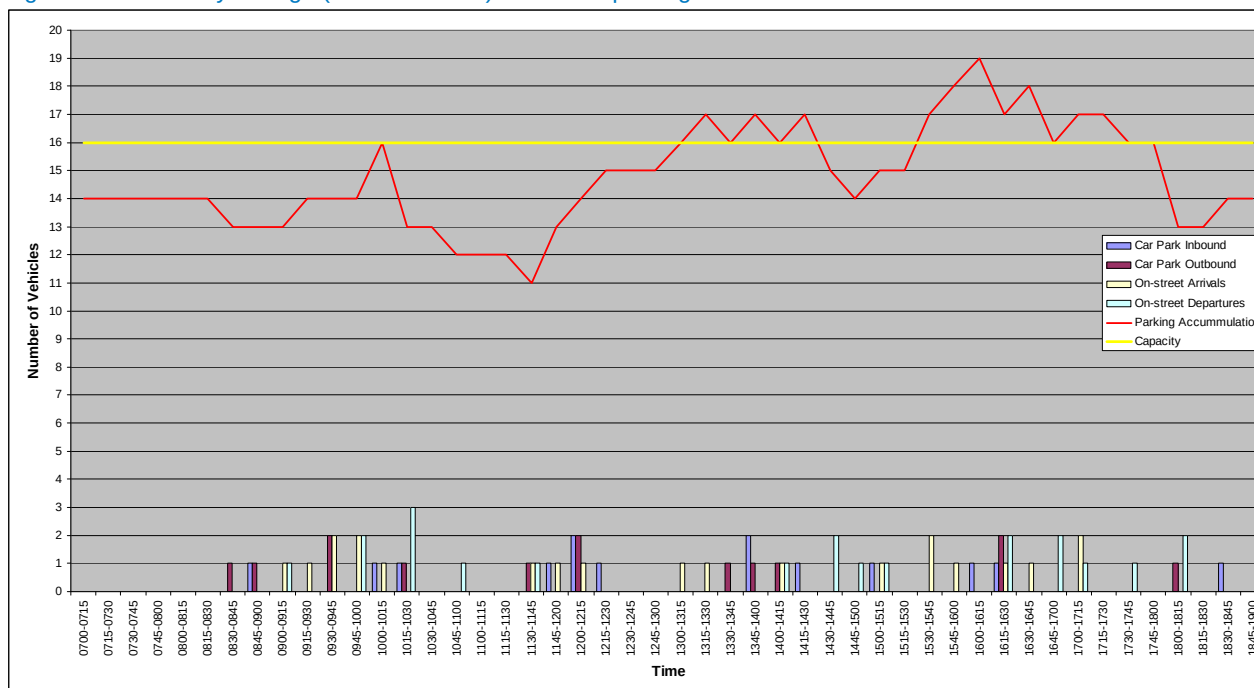

Figure 2.5 shows that the main car park is operating within its maximum capacity (16 vehicles). The maximum number of parked cars was 15, which was recorded during 1600-1615.

Figure 2.6 overleaf identifies the impact of on-street parking activity.

Figure 2.6: Llewelyn Lodge (Bexhill-on-Sea) – total car parking

Including the on-street parking associated with the Lodge, **Figure 2.6** shows that from 1315 to 1430 the total parking demand exceeds the car park capacity by one vehicle. However, as the afternoon progresses, there is a gradual increase, peaking between 1600 to 1615 when there were 19 parked cars associated with the Lodge.

2.2.5 Mottisfont Lodge (Romsey)

Located at Alma Road, Romsey, CRL confirmed that Mottisfont Lodge is fully occupied, with all 31 apartments sold. There are 11 car parking spaces providing a ratio of 0.35 on-site spaces per residential unit. It is understood that 6 residents own a car.

The surveys were carried out on Tuesday 8th May 2012, there were eight cars parked at 0700 and seven cars parked at 1900. **Figure 2.7** overleaf shows the on-site car parking results.

Figure 2.7: Mottisfont Lodge (Romsey) – on site parking

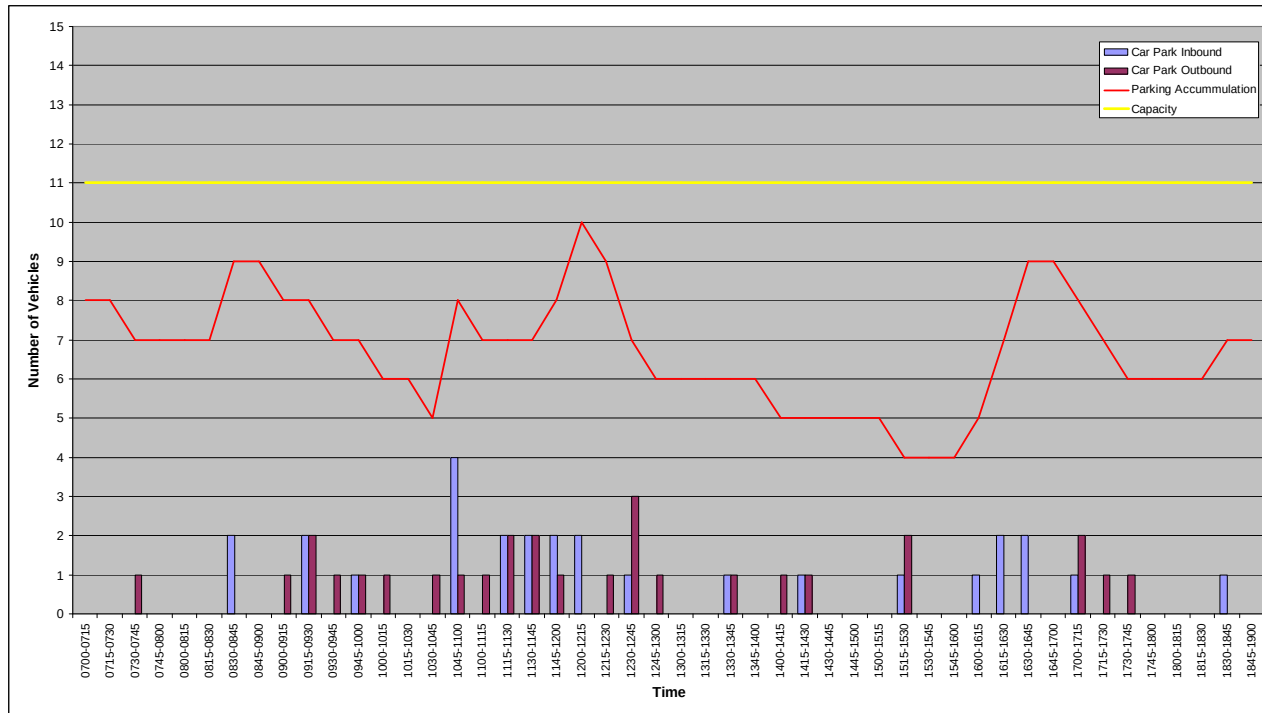

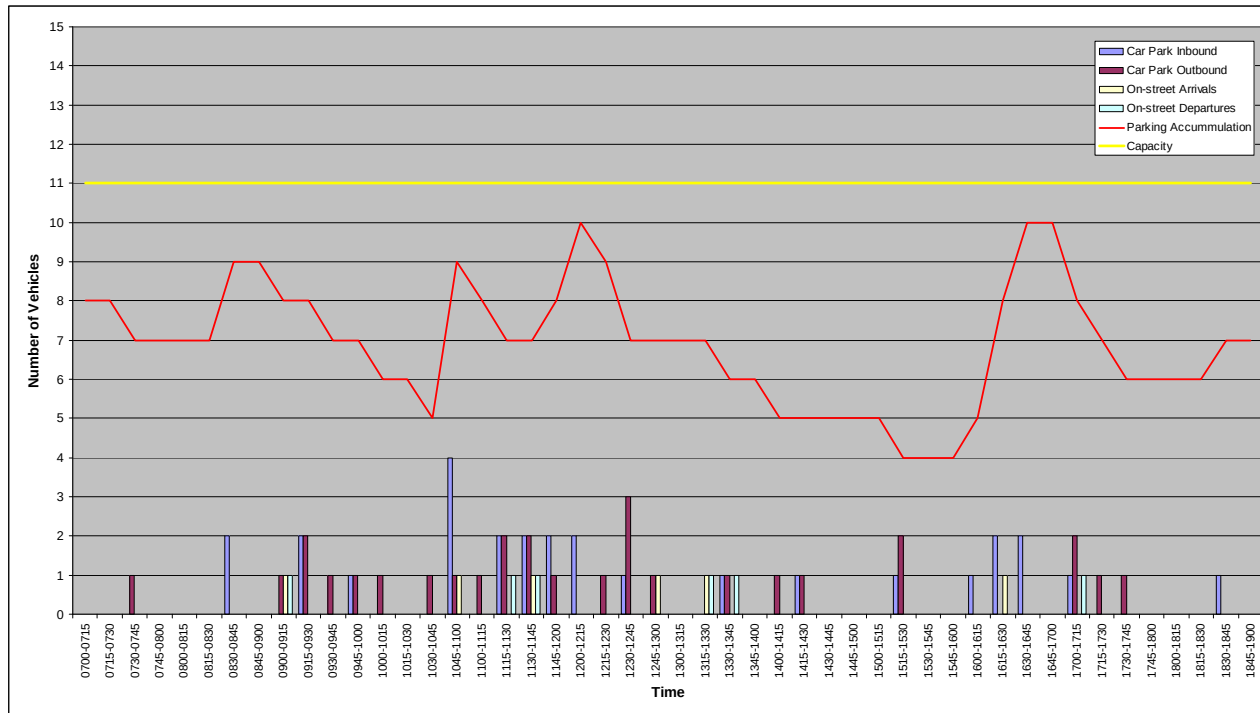

Figure 2.7 shows that maximum car parking capacity (11 vehicles) was not reached on the day of the survey; the maximum recorded value was ten. The parking accumulation peaked during 1200-1215, but during the 12 hour period, despite there being near continuous inbound and outbound movements, parking remained below capacity.

Figure 2.8 overleaf shows that there was very limited parking demand on-street, suggesting that the car parking available on site is sufficient to accommodate the total demand.

Figure 2.8: Mottisfont Lodge (Romsey) – total car parking

2.2.6 Queen Elizabeth (Cliftonville)

Located at Laleham Gardens, Cliftonville, CRL confirmed that Queen Elizabeth is fully occupied, with all 34 apartments sold. There are 11 car parking spaces providing a ratio of 0.32 on-site spaces per residential unit. It is understood that 8 residents own a car.

The surveys were carried out on Wednesday 9th May 2012, there were seven cars parked at 0700 and nine cars parked at 1900. **Figure 2.9** overleaf shows the on-site car parking results.

Figure 2.9: Queen Elizabeth (Cliftonville) – on site parking

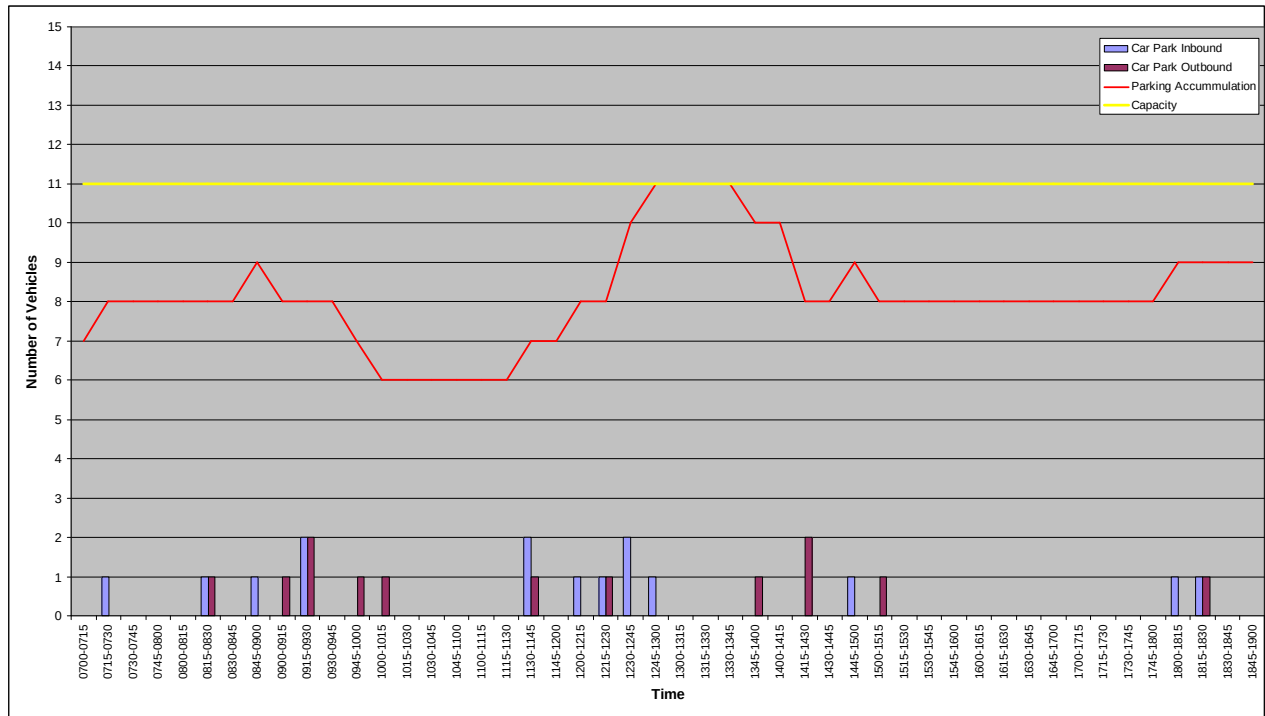

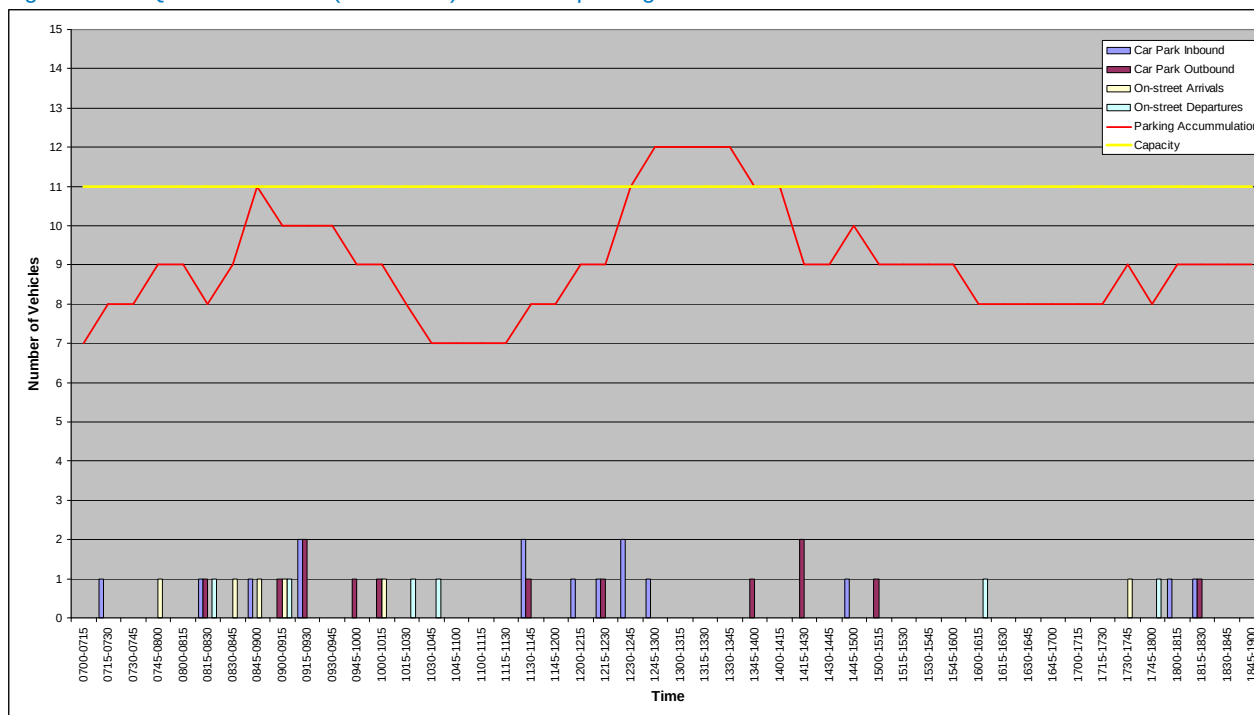

Figure 2.9 shows that maximum parking capacity was reached, but not exceeded, between 1245 and 1345. On-site parking either side of this time segment totalled around eight to nine vehicles. Between 1515 and 1800 there were no arrivals or departures.

Figure 2.10 overleaf identifies the impact of on-street parking activity.

Figure 2.10: Queen Elizabeth (Cliftonville) – total car parking

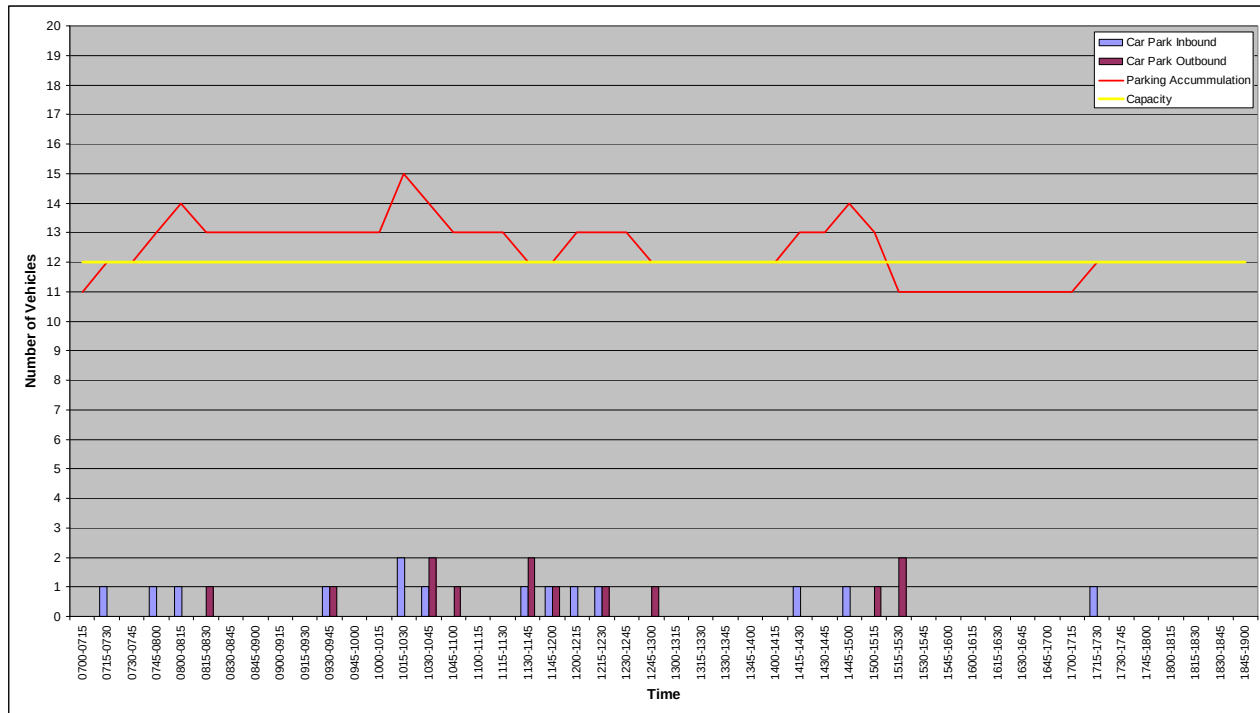

Looking at the on-street parking, between one and three vehicles were parked between 0845 and 1600. This is reflected in **Figure 2.10**, whereby the total parking accumulation line exceeds the maximum capacity of the car park.

2.2.7 Tyrell Lodge (Chelmsford)

Located at Springfield Road, Chelmsford, CRL confirmed that Tyrell Lodge is fully occupied, with all 39 apartments sold. There are 11 car parking spaces providing a ratio of 0.28 on-site spaces per residential unit. It is understood that 11 residents own a car.

The surveys were carried out on Wednesday 9th May 2012, there were 11 cars parked at 0700 and 12 cars parked at 1900. **Figure 2.11** overleaf shows the on-site car parking results.

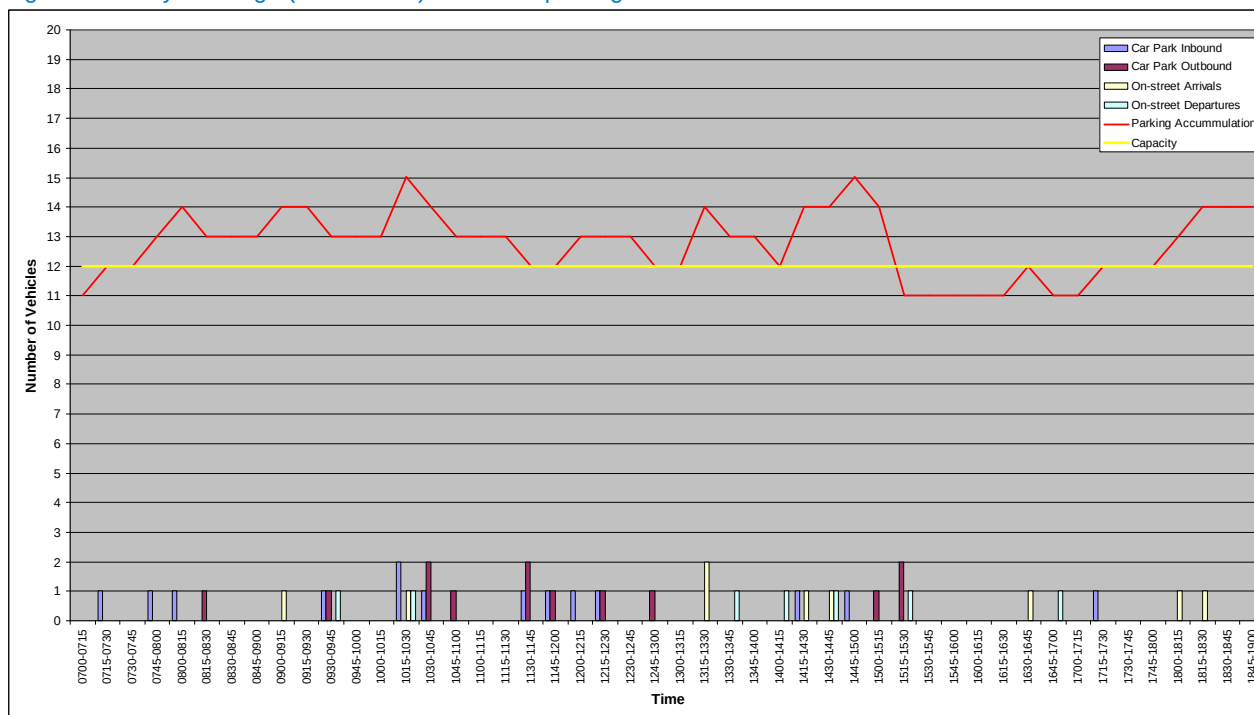

Figure 2.11: Tyrell Lodge (Chelmsford) – on site parking

It can be seen from **Figure 2.11** that throughout a 12 hour period, parking accumulation reaches or exceeds maximum capacity (12 vehicles). There was a two hour period where 11 vehicles were parked, during 1515 to 1715.

Figure 2.12 overleaf identifies the impact of on-street parking activity.

Figure 2.12: Tyrell Lodge (Chelmsford) – total car parking

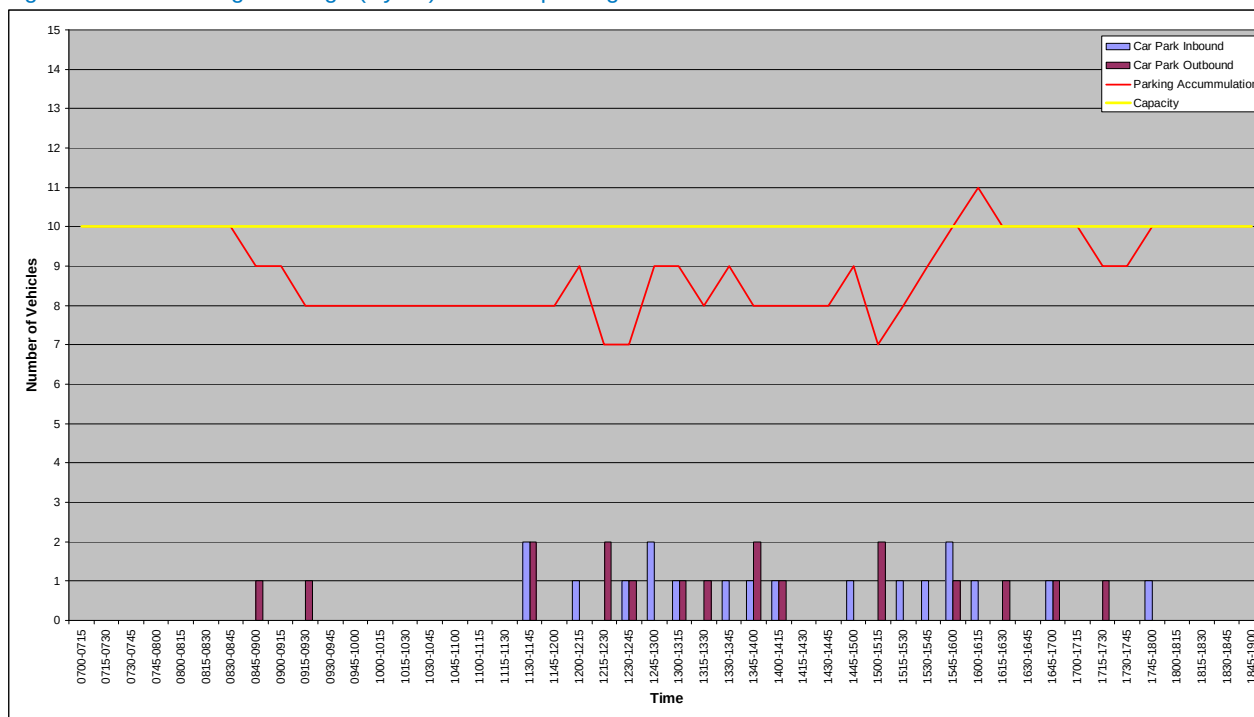

On-street parking associated with Tyrell Lodge was limited, with between one or two vehicles parked between 1315 and 1515, and then again from 1800 to 1900.

2.2.8 Worthington Lodge (Hythe)

Located at East Street, Hythe, CRL confirmed that Worthington Lodge is fully occupied, with all 39 apartments sold. There are 10 car parking spaces providing a ratio of 0.26 on-site spaces per residential unit. It is understood that 11 residents own a car.

The surveys were carried out on Thursday 10th May 2012, there were 10 cars parked at 0700 and 10 cars parked at 1900. **Figure 2.13** overleaf shows the on-site car parking results.

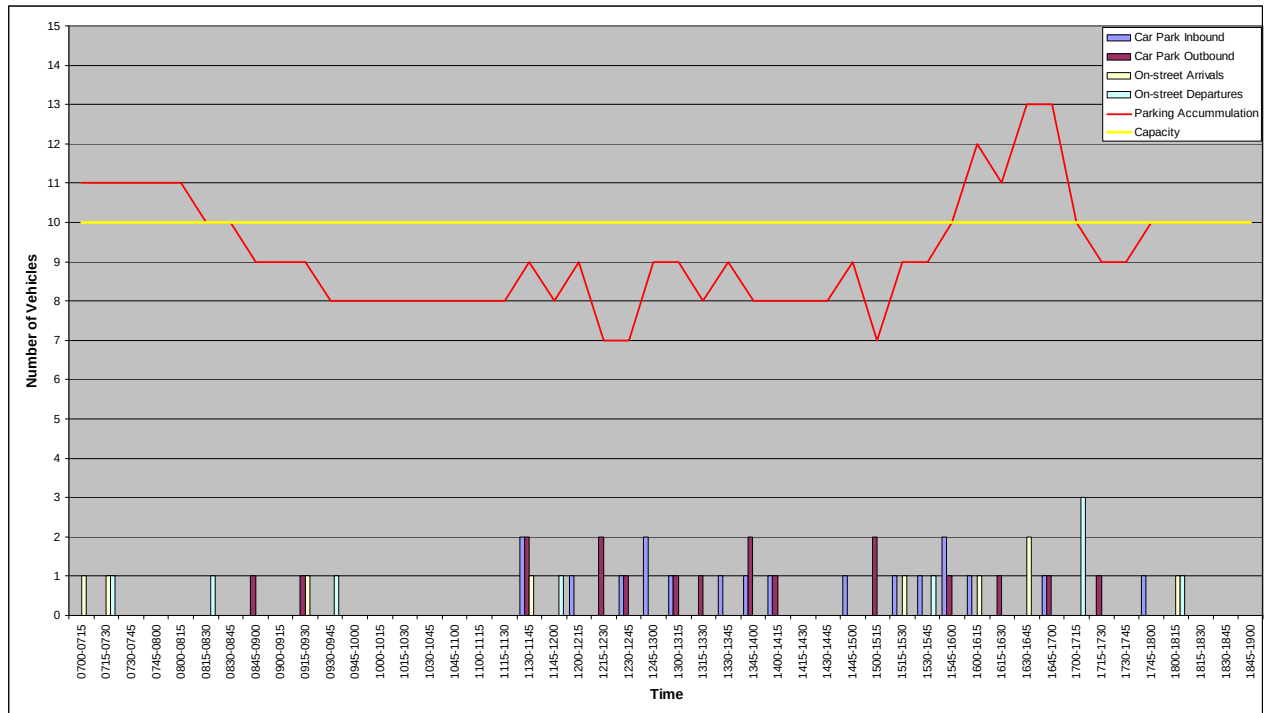

Figure 2.13: Worthington Lodge (Hythe) – on site parking

It can be seen from **Figure 2.13**, that there was limited activity in the car park during the morning. Vehicles started to arrive and leave from 1130 onwards, which can be seen in the parking accumulation line, as it starts to fluctuate. During 1600 to 1615, parking exceeded capacity by one vehicle.

Figure 2.14 overleaf identifies the impact of on-street parking activity.

Figure 2.14: Worthington Lodge (Hythe) – total car parking

Including the on-street parking activity, the total parking demand exceeds the site capacity during 0700 to 0815 as well as at 1600 to 1700. The maximum recorded value was 13 parked cars during 1630 to 1700.

3. Parking trip rates

3.1 Trip rates

3.1.1 Survey results

The car park surveys have allowed a trip rate for each CRL site to be calculated. The total 12 hour weekday flows (Tuesday, Wednesday or Thursday) recorded between 0700 and 1900 are presented in **Table 3.1**. These values represent total car parking activity associated with each site (including parking within the site and on-street parking).

Table 3.1: Total vehicle movements (on-site car park and on-street)

CRL site/location	Weekday 12 hr Arrivals	Weekday 12 hr Departures	Weekday 12 hr Two Way
Acacia Lodge, Fareham	34	30	64
Andrews Lodge, Lymington	26	29	55
Blenheim Lodge, Amersham	19	20	39
Llewelyn Lodge, Bexhill-on-Sea	35	35	70
Mottisfont Lodge, Romsey	34	35	69
Queen Elizabeth, Cliftonville	21	19	40
Tyrell Lodge, Chelmsford	23	20	43
Worthington Lodge, Hythe, Kent	27	27	54

Applying the 12 hour flows to the number of residential units, a rate per unit can be determined. The parking rate for each site is shown in **Table 3.2**.

Table 3.2: Total car parking trip rates (per unit)

CRL site/location	Weekday 12 hr Arrivals	Weekday 12 hr Departures	Weekday 12 hr Two Way
Acacia Lodge, Fareham	0.74	0.65	1.39
Andrews Lodge, Lymington	0.74	0.83	1.57
Blenheim Lodge, Amersham	0.63	0.67	1.30
Llewelyn Lodge, Bexhill-on-Sea	0.73	0.73	1.46
Mottisfont Lodge, Romsey	1.10	1.13	2.23
Queen Elizabeth, Cliftonville	0.62	0.56	1.18
Tyrell Lodge, Chelmsford	0.59	0.51	1.10
Worthington Lodge, Hythe, Kent	0.69	0.69	1.38
CRL Site Average	0.73	0.72	1.45

3.1.2 TRICS data comparison

TRICS Version 2012(a) v6.9.2 has been interrogated to establish trip rates for other sheltered accommodation sites and this data has previously been used to support CRL planning applications. The TRICS database contains 13 sites that have been surveyed since 2000. Data before 2000 has not been considered because of the changing trends in travel behaviour. The TRICS site references are given in **Table 3.3** together with the site description for each of the 13 sites.

Table 3.3: TRICS site information

TRICS reference	Location	Parking Space Numbers	Maximum Occupancy Recorded	On-street Parking Available?
CB-03-F-01	Sheltered Housing, Nr West Malling	34	41%	No
DC-03-F-02	Sheltered Housing, Carlisle	12	33%	Yes and included in survey
DS-03-F-01	Sheltered Housing, Ipswich	18	150%	Yes and included in survey
ES-03-F-01	Sheltered Housing, Maidstone	24	33%	Yes and not included in survey
KC-03-F-02	Sheltered Housing, Preston	6	67%	No
KC-03-F-03	Sheltered Accommodation, Guildford	17	65%	Yes and included in survey
KH-03-F-01	Sheltered Housing, Poole	94	29%	Yes and not included in survey
KH-03-F-02	Sheltered Housing, Leicester	13	100%	Yes and included in survey
LC-03-F-01	Sheltered Housing, Derby	12	67%	Yes and included in survey
LE-03-F-01	Sheltered Housing, Eastbourne	14	36%	Yes and included in survey
SC-03-F-01	Sheltered Housing, Hull	10	80%	Yes and not included in survey
SF-03-F-01	Sheltered Housing, Hull	32	56%	Yes and included in survey
WY-03-F-01	Sheltered Housing, Leeds	12	50%	Yes and not included in survey

Source: TRICS, version 2012(a)6.9.2

The average TRICS results for the above sites during the time period 0700-1900 can be compared to the average trips recorded at the eight sites in the May 2012 surveys. It should be noted that on-street parking was not recorded at four of the 13 sites, however, low car park occupancy at these locations suggest that this was not a significant issue. The results of this comparison can be seen in **Table 3.4**.

Table 3.4: Comparison of survey results with TRICS trip rates (per unit)

	Weekday 12 hour arrivals	Weekday 12 hour departures	Weekday 12 hour Two-way
Average CRL survey rate (May 2012)	0.73	0.72	1.45
Average TRICS rate	1.07	1.08	2.15

The 2012 survey results show that the historic TRICS surveys overestimate the trip rates that are associated with CRL sheltered accommodation units.

3.2 Parking trip rates

In order to determine whether the current parking provision is adequate for CRL developments, an average parking accumulation across all eight sites has been identified to highlight an overall trend. Both on-site only and total parking demand results are presented in **Figure 3.1** overleaf.

Figure 3.1: CRL Sites - Average parking demand / unit summary

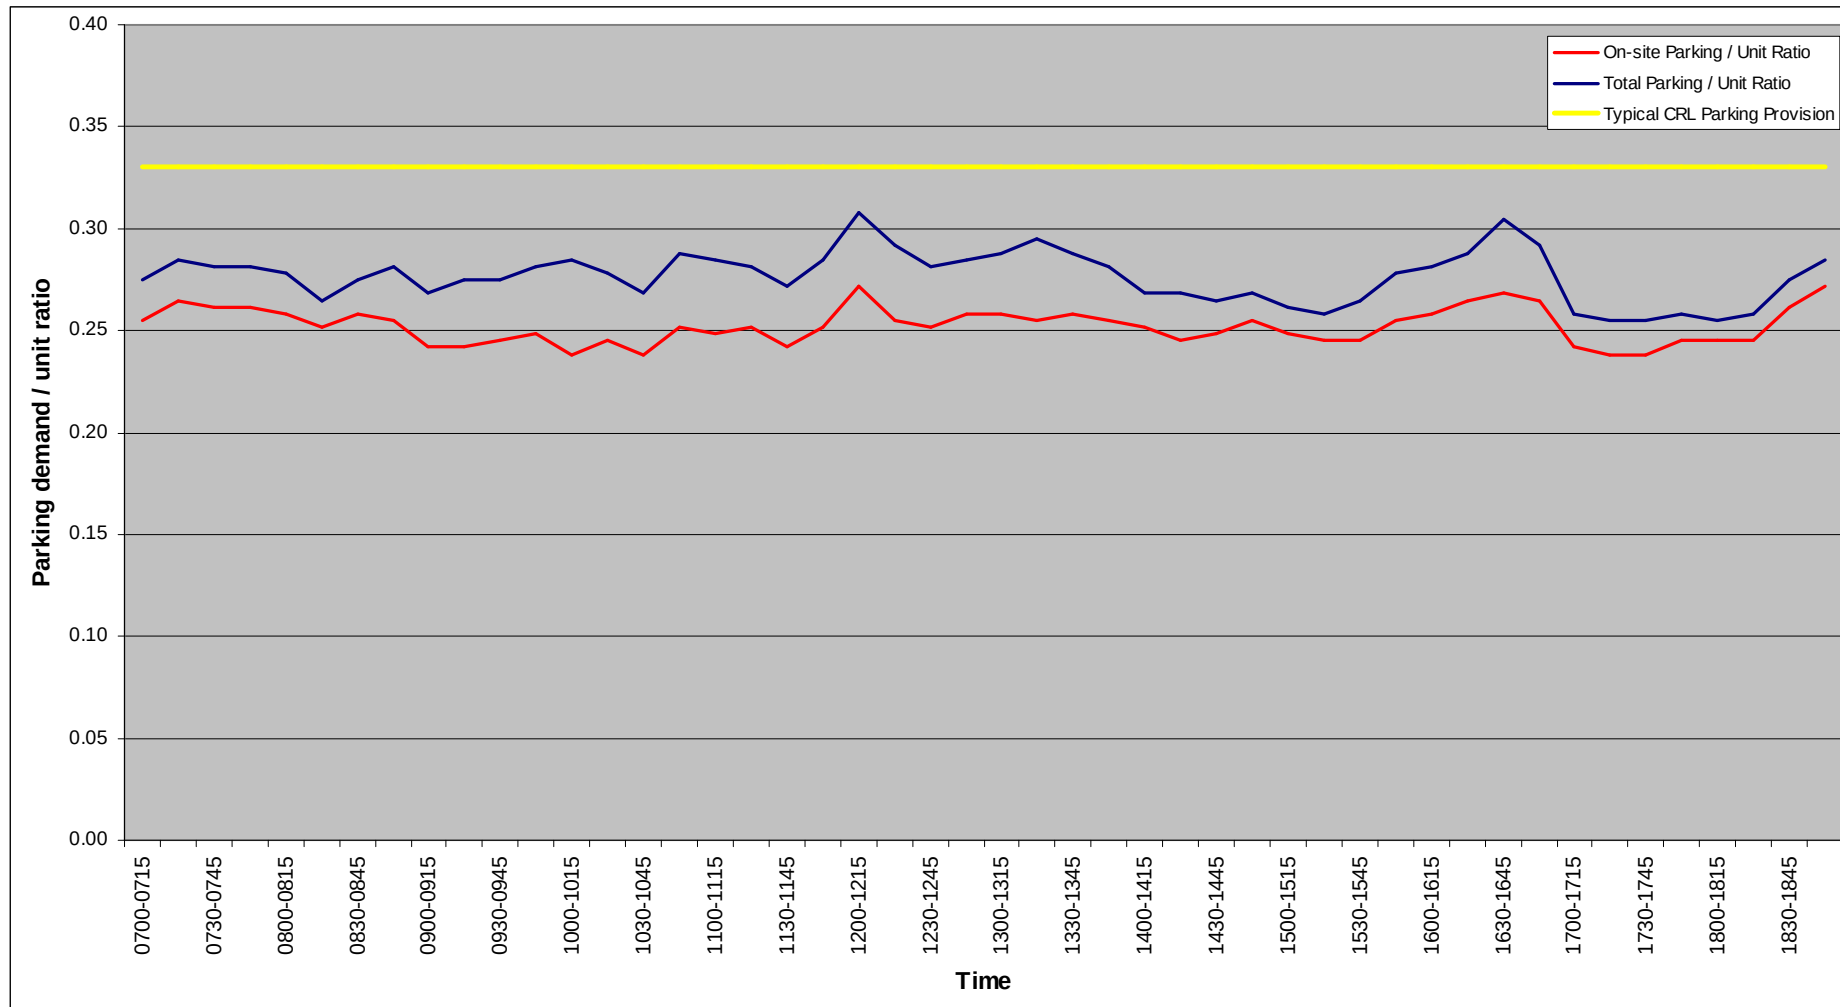

Figure 3.1 shows the average parking demand across the eight locations, broken down to on-site and total parking demand. These trends are directly compared to the current parking ratio which CRL apply to new developments; this is understood to be 0.33 spaces per residential unit. For the eight sites which were surveyed, the average parking provision is 0.32 spaces per residential unit.

It can be seen from **Figure 3.1** that during the 2012 surveys, parking demand across the eight sites was below that of the current CRL parking provision. From the data, the average on-site parking demand is 0.25 spaces per residential unit, and total parking demand, which is the sum of on-site and on-street, is 0.28 spaces per residential unit.

4. Summary

Over two weeks, from Tuesday 1st May to Thursday 10th May 2012, car park surveys were carried out at eight established CRL sites where all units are occupied. The counts were carried out on neutral days, and provided data on parking activity and the vehicle trip rates associated with each site. A summary of the results is provided in **Table 4.1**.

Table 4.1: Summary of CRL sites and survey results

CRL site/location	Units Occupied	Parking Spaces Available	Parking Spaces Per Unit at the time of the survey	Recorded two-way trip rate
Acacia Lodge, Fareham	46	15	0.33	1.39
Andrews Lodge, Lymington	35	11	0.30	1.57
Blenheim Lodge, Amersham	30	9	0.30	1.30
Llewelyn Lodge, Bexhill-on-Sea	48	16	0.33	1.46
Mottisfont Lodge, Romsey	31	11	0.35	2.23
Queen Elizabeth, Cliftonville	34	11	0.32	1.18
Tyrell Lodge, Chelmsford	39	11	0.28	1.10
Worthington Lodge, Hythe Kent	39	10	0.26	1.38
Average	38	12	0.32	1.45

In order to account for overall CRL parking demand, an average unit ratio for the eight sites has been calculated. The average parking demand for on-site parking is 0.25, with total parking (on-site and on-street) being 0.28. This ratio is below the current 0.33 spaces per residential unit.

Based on the average parking rate developed from the survey results, the current parking provision could be considered adequate. However, the results demonstrated that there was no “typical” peak in parking demand and the average calculations have tended to flatten the impact of short term parking demand peaks. It should be noted that at six of the eight sites, when including all parking associated with the Lodge, the capacity of the car park was maximised or exceeded on one or more occasions. Given this, depending on the location and factors such as the availability of on-street parking and the sensitivity of the local area, consideration may need to be given to the provision of additional parking for visitors.

The surveys revealed that at sites with on-street parking availability, vehicles were parking here, especially if it was considered more convenient than using the on-site facilities. This was the case at Andrews Lodge, Lymington, where the car park is located at the rear of the site, but as there are opportunities to park on-street, nearer to the front access, this proved more popular than using the car park.

Given the favourable comparisons that have been made against the TRICS trip rate data that has been used previously in planning submissions, it is recommended that the new 2012 survey data is now adopted for use within such submissions.
