Hi Daphney

The lights stay on for 3 minutes once activated. This is a fixed time and cannot be adjusted.

Regards

Hannah

Thanks Hannah

Can you advise as to how long the lights will remain on for?

Hi Daphney

Re: Condition 6; external lighting.

I have just had a conversation with Mark Moss and he has clarified the information he is after on the external light fitting. Unfortunately this information is not readily available from the supplier/manufacturer of the product we originally specified (as experienced by Mark and myself). Therefore may we put forward an alternative light fitting? The alternative light fitting we propose is the **ASD Lighting Horizon Round Eyelid** with PIR - please see the attached data sheets. We would propose this fitting with a 16W Low Energy 2D bulb. We can also confirm that the PIR will be set to the lowest sensitivity setting.

Please contact us should you require any further information at this stage.

Kind regards

Hannah

Hello Daphney

As per discussion of yesterday, please be advised that I am not 100% confident going on the information given by the applicant that the LED lights proposed to be utilized, will not present a light pollution aspect to neighbouring properties. I have also spoken with the distributors of these lights who promised to e-mail me further information as illumination levels, angles of throw etc. .It would therefore be appreciated if a request for further information be requested from the applicant, including the above information.

Kind regards

Mark Moss

Mark

Discharge of Condition 6 of Planning Permission APP/13/00765

Not sure if this has gone to you – if not could you please forward to the relevant person.

This relates to external lighting and I have received a number of concerns from the neighbours – pl see link below.
