Hi Daphney

I think the waste condition is 10 with the lighting one being 9. However the waste condition was confusing as it started off as referring to 'no development ... related site clearance .. until plans & particulars submitted re waste disposal'. If the intention is in relation to waste generated from the day to day business operation only, then I would have no problem having the condition discharged as there will, in all likelihood, not be a massive increase in this regard and although no indication has been given as to receptacle type etc, its an ongoing business so it should be fine to discharge the condition.

We don't generally call for disposal measures related to site clearance waste, as they are normally covered in the CMP, but with the dearth of info coming in on this app, I doubt there is currently a CMP in place.

Kind regards
