Quality G.R.P. Enclosures

Scottish and Southern Energy plc

Envico Engineering are experts in the design & development of quality GRP Enclosures primarily for the electricity distribution, gas and water industries. Enclosures are manufactured to exacting standards, incorporating all the main specification requirements of these and other allied industries and are designed to satisfy architectural, engineering & planning requirements.

Typical enclosures shown are the result of close co-operation between Envico Engineering and Scottish & Southern Energy, where consideration has been given to modern environmental and architectural requirements, together with building standards employed to combat the ever increasing problem of vandalism
