

Subject: RE: Planning Application APP/15/01094 Land rear of, 10-16 Forest Avenue, Waterloooville

The AIA, AMS/TPP is comprehensive and serves the application well in terms of accuracy, survey and recommendations. The removal of the five Alder is acceptable and can be mitigated for, the removal of a poor quality Cypress on arb grounds is advisable.

However other than the following comment I can not find any reference to mitigation planting on site:

"Replacement trees can be planted as part of the landscaping proposals to be submitted with the planning application and these new trees will more than mitigate the loss of the Alders and will enhance the site for the future."

Prior to my support of this application I would like to see a Landscape Master Plan demonstrating a comprehensive planting scheme for the site.

Thanks
