

Tree Planting Pit Detail

Root Rain Metro tree pit irrigation system as supplied by Green-Tech Industries or similar and approved

The tree should be positioned in the hole so that the top of the rootball is level with the surrounding ground level

Backfilled material to be either originally excavated soil or imported soil to BS882:2007. If judged to be of poor quality then suitable well rotted organic matter must be added. To be backfilled in layers of 300mm, each layer to be lightly firmed in with heel, to exclude large voids

All components as supplied from Green Leaf or similar and approved

Wire cage to be left on, and folded back over around stem, if rootballed.

Rubber belting and spacer block attached with galvanised nails as supplied from Green-Tech Industries or similar and approved with its height 1/3 stem height

Good quality, well rotted mulch to be applied to a minimum of 75mm depth, and no more than 150mm, leaving the stem base clear and mulch free

Tree pit to be no deeper than rootball, 600mm larger than rootball on all sides, and should be square with sides and base of pit to be forked over

Planting Schedule (dwg. 19)
