

To Mrs Heather Lealan havant borough council planning office.

Dear Mrs Lealan.

I hope i can do this explanation properly and do it justice,if you have any problem,s with it please phone me on [REDACTED] and i will gladly come down to Havant to see you and i am sure we can get it right .

As i understand it the main objection,s are noise pollution and the hour,s it is to be open .

1. Noise pollution.

The amount of noise from the shed would be no more than any other garden shed ,as members would cut any material required and then carry on with their projects with hand tools.

my estimation is possibly as low as 7% noise over any one day from machines ,members will switch machine,s off when not in use as we have to be aware of the energy cost .

2. opening times.

I understand there is a worry about the opening times ,may we suggest that to eliminate any problem,s in the car park we will change the opening times to 9.30am to 4.00pm mon to friday and not use any machine,s before 10.00am.

There will be no evening,s, bank holiday,s or weekend opening ,with the exception of an occasional saturday open day when no machines will be working.

Yours sincerely .

Chris Davage.
