

Hi Daphney,

Apologies – I thought I'd already stated that I was content with matters.

I have received the Atkins Habitat Management and Maintenance Plan from PCC – this appears to be an identical document to that previously submitted so I assume nothing has changed. I have also been in contact with Chloe Delgery at Atkins who has clarified that ecological monitoring works are ongoing at the site and has confirmed that Atkins are undertaking all necessary supervision etc.

In summary, there is no ecological constraint to the works commencing on Monday 15th.

I hope this clarifies matters.

Kind regards,

Tristan
