Re 80a West Street Havant
Planning Ref APP/13/00051. Removal of trees T7 & T8 Macrocarpa

Dear Mr. Newby,

Further to our discussions regarding the above trees, we would totally echo the sentiments expressed by our neighbours, Mrs Quinney and Mrs Scanlon at nos 78 and 80 West Street, in their letter to you setting out their concerns caused by these rapidly growing trees.

Despite the damage these trees are causing to our boundary wall, it is our considered view the conservation area would be much enhanced by their removal. They are not suitable trees for the small-scale rear cottage style gardens behind West Street. The created shade and the dropping of needles, 'poisons' the back gardens from 78 - 80a and suffocates all growth for a considerable area. If retained the unacceptable situation will deteriorate further.

The trees already planted to the perimeter of the Retail Park to the north of the conservation area are now beginning to mature and screen the gardens and it is our view no further alternative major planting is required. In our opinion, further garden development would be best left in the hands of those people residing in the conservation area.

I trust you will pass on our observation to the Planning Dept.
