Dear Sir/Madam,

Ref: Statement of progress of bat surveys
Address: 38-44 London Road, Purbrook, Waterloooville, Hampshire, PO7 5LJ

With reference to your request of the 12th August 2015 I can confirm that an internal and external inspection of the buildings on the site has taken place on Monday 3rd August 2015 and no direct evidence of bats roosting within any of the buildings was found. The main office building in the North West corner of the site has a series of hanging tiles and natural timber cladding on two elevations.

A dusk survey has taken place on the evening 3rd August 2015 and no bats were seen to exit any of the buildings on the site. Common Pipistrelle bats were recorded late within the survey occasionally passing over the site in the North West corner before returning to the churchyard opposite the site. One other survey is to take place and a full report will be produced in due course.

Yours faithfully

A handwritten signature in black ink, appearing to read "P. May".
