24 August 2015

Dear Steve

HAYLING SEASIDE RAILWAY –DISCHARGE OF BUILDING CONDITION (CONDITION 6)
PROPOSED DEPOT: EASTOKE CORNER

I refer to recent discussions and enclose the documents and photos for the discharge of above building condition in respect of application for the new Depot at Eastoke Corner. Also enclosed is a cheque for £97.00 to cover this and for condition 7 (Mural aspects). Could you please provide a receipt in due course.

In respect of the external facing material, samples of the timber cladding material option are enclosed. You have already seen samples of the fibre comment option, but if you still need this please let me know. Whilst appreciating this was the preferred option, there are concerns that this material will be vulnerable to damage (being cracked and smash) through vandalism for example, if stones are thrown from the adjacent gravelled car park. Samples of the Kingspan option are being obtained and will be delivered to you in the next day or so.

If you need samples of the Versasteel tile effect sheet material please let me know

Thank you for your help in this matter and look forward to hearing from you.

Yours faithfully,

Cliff Robinson
Hayling Seaside Railway Project Manager
