Dear Customer,

Re: Enquiry at: 97-109 North Street, Emsworth PO10 7PH.

Thank you for your enquiry regarding the above location.

There is High Pressure apparatus in the vicinity; accordingly a copy of your correspondence has been sent to our local engineer, who will be in contact shortly. It is essential that no work or crossings of this high pressure pipeline is carried out until a detailed consultation has taken place.

Please find enclosed an extract from our mains records in the location of the area covered by your proposals for your guidance. This plan only shows those pipes owned by SGN in its role as a Licensed Gas Transporter (GT). It should be noted that gas pipes owned by other GTs or privately owned may be present in this area and information regarding such pipes should be obtained from the owners. Where SGN knows this, they will be represented on the plans as a shaded area and/or a series of x's.

The information shown on this plan is given without obligation, or warranty and the accuracy cannot be guaranteed. Service pipes, valve siphons, stub connections etc, are not shown but their presence should be anticipated. Your attention is drawn to the information and disclaimer on these plans. The information included on the plan is only valid for 28 days.

You will note the presence of our Low/Medium/Intermediate Pressure gas main in the proximity to your site. There should be **no** mechanical excavations taking place above or within **0.5m** of the low pressure system, **0.5m** of the medium pressure system and **3m** of the intermediate pressure system. You should where required **confirm the position** of mains **using hand dug trial holes**.

A colour copy of these plans and the gas safety advice booklet should be passed to the senior person on site in order to prevent damage to our plant and potential direct or consequential costs to your organisation.

24 hour gas escape number 0800 111 999*
*Calls will be recorded and may be monitored

Southern Gas Networks plc is part of the Scotia Gas Networks Group
Registered Office: St Lawrence House Station Approach Horley

<http://www.sgn.co.uk>

For safety reasons, safe digging practices, in accordance with HSE publication HSG47 "Avoiding Danger from Underground Services" must be used to verify and establish the actual position of mains, pipes, services and other apparatus on site before any mechanical plant is used. It is your responsibility to ensure that this information is provided to all persons (direct labour or contractors) working for you on or near gas plant. In addition please follow the advice given in our gas safety booklet (enclosed).

It must be stressed that both direct and consequential damage to gas plant can be dangerous both for your employees and the general public, repairs to any such damage will incur a charge. Your works should be carried out in such a manner that we are able to gain access to our apparatus throughout the duration of your operations.

If you require any further information please contact the number below.

Yours faithfully,

Lesley Phillips
