1 Introduction

1.1 Background

In May 2012 Mott MacDonald carried out traffic surveys at eight established Churchill Retirement Living (CRL) sites across southern England. The 2012 survey was undertaken to identify the parking trends and vehicle trip generation associated with each of the lodge developments. With this previous survey information being two years old, a new study has been commissioned to update the initial survey findings. The 2014 surveys were specified to identify parking accumulation and trip rates at eight CRL sites, these being:

1. Hampton Lodge, Sutton
2. Lord Rosebery Lodge, Epsom
3. Churchill Lodge, Lilliput
4. Mitchell Lodge, Bitterne
5. Mulberry Lodge, Emsworth
6. Park View Lodge, Faversham
7. Mottisfont Lodge, Romsey
8. St Mary's Lodge, Birchington

The 2014 surveys were completed on a single day at each of the Lodge sites, and were undertaken by count enumerators and using video analysis. This methodology was adopted for the 2012 surveys and proved to be very successful in capturing vehicle movements into and out of the Lodge car parks. The enumerators recorded the number of vehicles arriving and departing to/from each site, the number of parked vehicles within the site at the beginning and end of the survey period, and in addition, any on-street parking activity associated with the Lodge development site.

The results of the 2014 parking surveys for each site are presented in Section 2, with Section 3 detailing the trip rate. A summary is provided in Section 4.

2 Parking survey results

2.1 Introduction

Car park surveys were carried out at each of the eight CRL sites on a neutral day (Tuesday or Wednesday or Thursday) in a neutral month with no public holidays (March) in 2014 over 12 hours (0700-1900).

The following survey information was recorded at each of the eight sites:

- Vehicle movements into and out of the site;
- The number of vehicles parked at the start of the survey (0700) and end of the survey (1900) so parking accumulation can be calculated; and
- Number of vehicles associated with the Lodge parking on the road immediately outside of the site to determine if there is overspill from the Lodge.

The survey results are presented in **Section 2.2**, showing the on-site parking demand and also the total parking demand, including any on-street parking that is associated with the Lodge. The full results of all of the car park surveys can be found in **Appendix A**.

2.2 Results summary

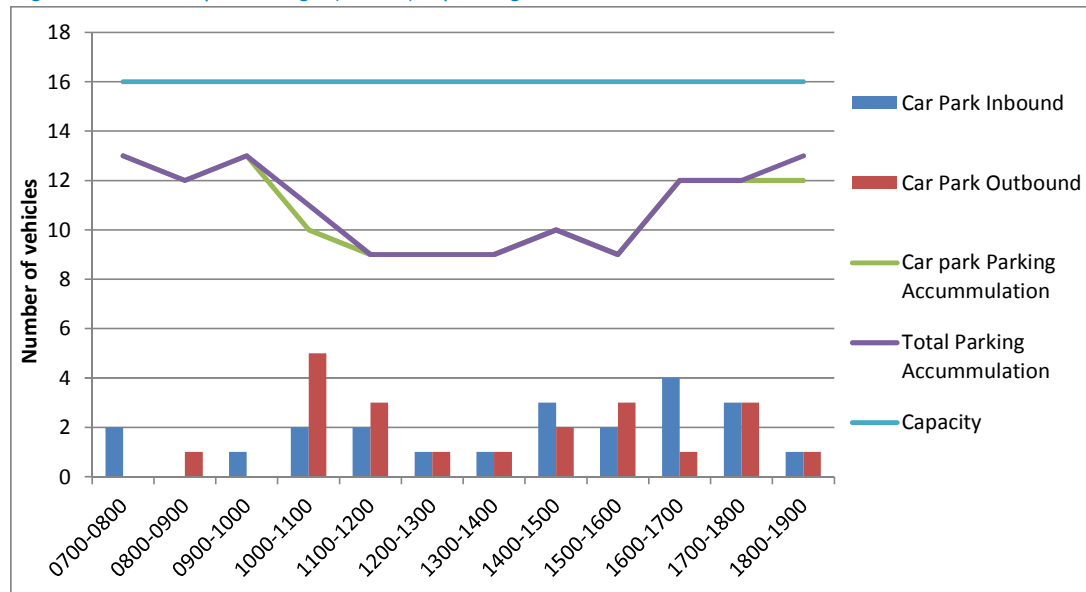

Within the graphs presented in the following sections, the blue bars denote inbound vehicles to the car park, the red bars denote outbound vehicles to the car park, the green line denotes car parking accumulation (this is the on-site car park) and the purple line denotes total parking accumulation which accounts for both on-site and on street parking.

2.2.1 Hampton Lodge, Sutton

Located at Cavendish Road, Sutton, the CRL website confirms that Hampton Lodge has sold all 39 apartments. There are 16 car parking spaces providing a ratio of 0.41 on-site spaces per residential unit.

The surveys were carried out on Tuesday 18th March 2014, 11 cars were recorded parked on the site at 0700 and 12 parked cars were recorded at 1900. **Figure 2.1** shows the car parking results.

Figure 2.1: Hampton Lodge (Sutton) – parking

The results presented in **Figure 2.1** show that the maximum capacity (16 vehicles) was not reached. The maximum number of parked cars on site was 13, and this occurred between 0700 and 0800, and 0900 and 1000. Despite there being available parking spaces, there were two occasions when vehicles were parked on-street. This was at 1000-1100 and 1800-1900, where one vehicle was parked on street, despite there being 10 and 12 parked vehicles on site, respectively.

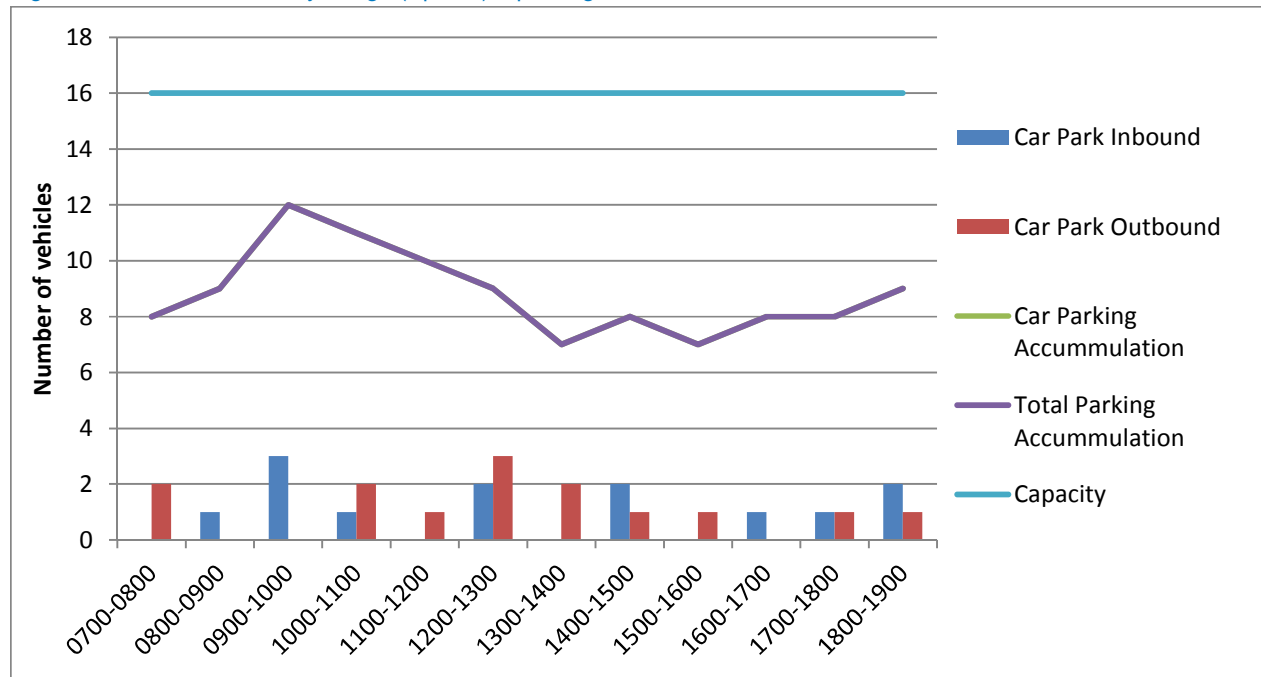

Peak outbound activity took place between 1000 and 1100 (five vehicles) with peak inbound movement being between 1600 and 1700 (four vehicles). There were no light goods vehicles using the site during the survey period.

2.2.2 Lord Rosebery Lodge, Epsom

Located at Elm Grove, Epsom, the CRL website confirms that Lord Roseberry Lodge has sold all 31 apartments. There are 16 car parking spaces providing a ratio of 0.52 on-site spaces per residential unit.

The surveys were carried out on Wednesday 19th March 2014, 10 cars were recorded parked on the site at 0700 and 9 parked cars were recorded at 1900. **Figure 2.2** shows the car parking results.

Figure 2.2: Lord Roseberry Lodge (Epsom) – parking

The results presented in **Figure 2.2** show that the maximum capacity (16 vehicles) was not reached. The maximum number of parked cars on site was 12, and this occurred between 0900 and 1000. The average number of parked cars during the survey period was eight. The survey results show no on-street parking associated with the Lodge.

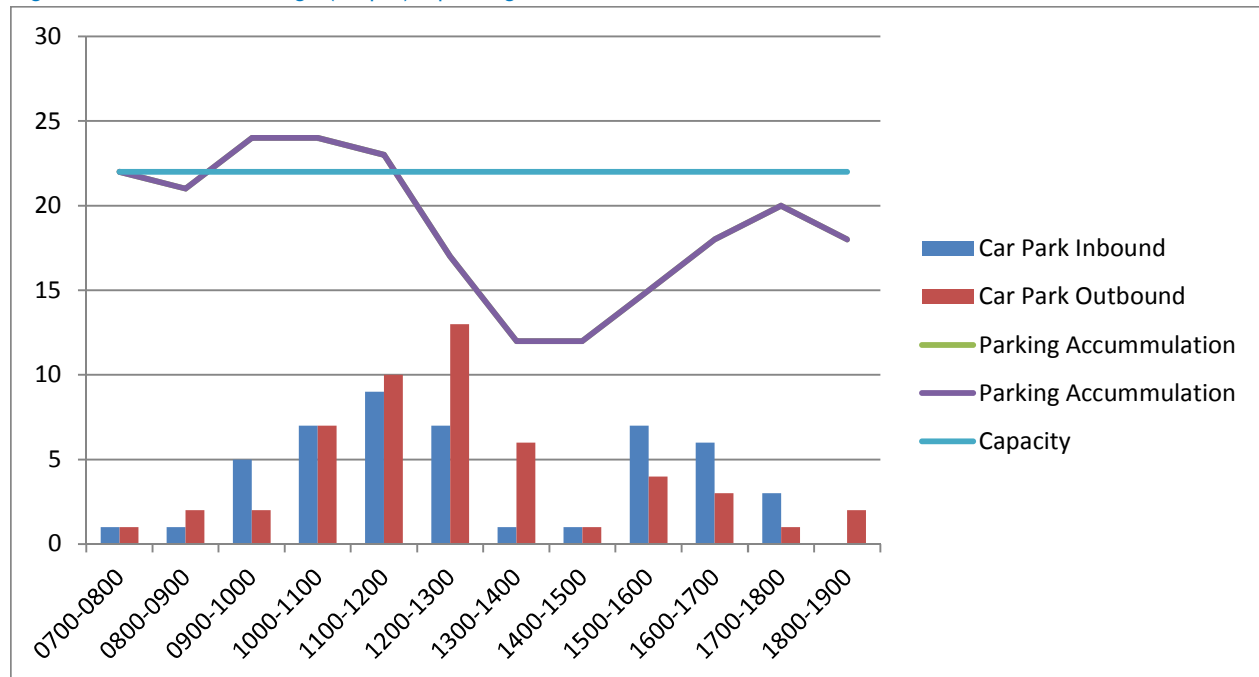

The number of arrivals and departures does not show any particular peaks with steady movement throughout the survey period. During the survey period, there were three light goods vehicles using the site.

2.2.3 Churchill Lodge, Lilliput

Located at Sandbanks Road, Lilliput, the CRL website confirms that Churchill Lodge has sold all 51 apartments. There are 22 car parking spaces providing a ratio of 0.43 on-site spaces per residential unit.

The surveys were carried out on Wednesday 26th March 2014, 22 cars were recorded parked on the site at 0700 and 18 parked cars were recorded at 1900. **Figure 2.3** shows the car parking results.

Figure 2.3: Churchill Lodge (Lilliput) – parking

The results presented in **Figure 2.3** show that the maximum capacity (22 vehicles) was exceeded on three occasions during the survey period. The three occasions were in the morning between 0900 and 1200. The number of parked cars was 24, 24 and 23 respectively. Looking at the survey data in closer detail, between 0900 and 1200, a motorcycle and two light good vehicles entered the site.

Despite the car being full, and over capacity, there was no on-street parking observed.

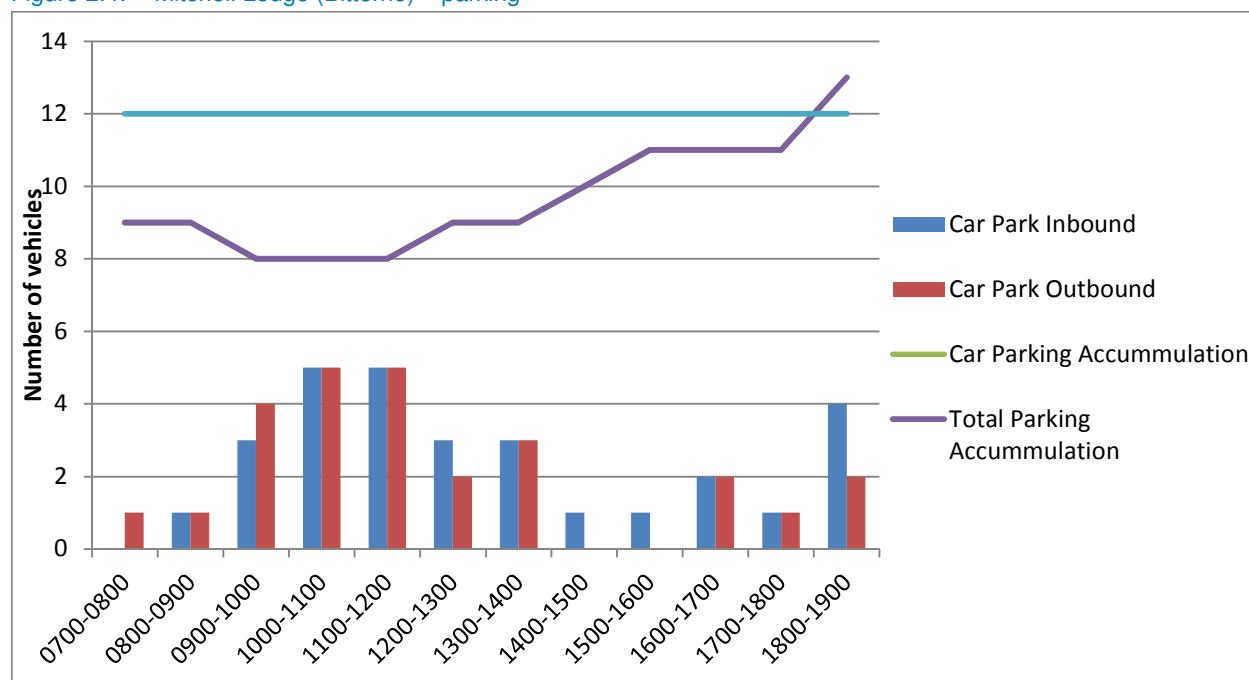

The graph shows that the inbound and outbound vehicles were very similar between 1000 and 1200, before a peak in outbound traffic between 1200 and 1300. During the survey, eight light goods vehicles entered and exited the site.

2.2.4 Mitchell Lodge, Bitterne

Located at West End Road, Bitterne, the CRL website confirms that Mitchell Lodge has sold all 36 apartments. There are 12 car parking spaces providing a ratio of 0.33 on-site spaces per residential unit.

The surveys were carried out on Wednesday 26th March 2014, 10 cars were recorded parked on the site at 0700 and 13 parked cars were recorded at 1900. **Figure 2.3** shows the car parking results.

Figure 2.4: Mitchell Lodge (Bitterne) – parking

The results presented in **Figure 2.4** show that the maximum capacity (12 vehicles) was reached on one occasion, and this was between 1800 and 1900. Looking at the survey data, 13 cars were parked at the end of the survey at 1900.

There was no on-street parking observed.

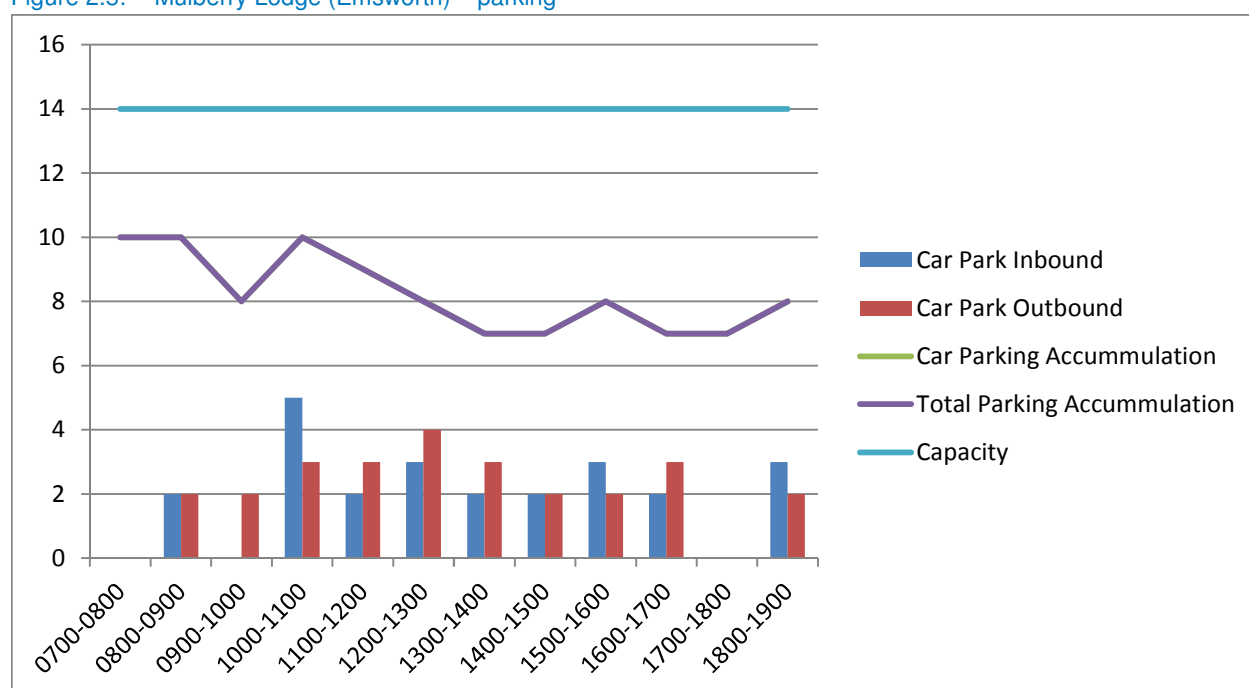

The graph shows that most vehicle activity, both inbound and outbound, took place between 1000 and 1200, with five vehicles entering and leaving the site in each hour. This activity is outside of what is generally considered a normal network peak (0800-0900 and 1700-1800). During the survey period, five light goods vehicles entered and exited the Lodge site.

2.2.5 Mulberry Lodge, Emsworth

Located at New Brighton End Road, Emsworth, the CRL website confirms that Mulberry Lodge has sold all 30 apartments. There are 14 car parking spaces providing a ratio of 0.47 on-site spaces per residential unit.

The surveys were carried out on Wednesday 26th March 2014, 10 cars were recorded parked on the site at 0700 and eight parked cars were recorded at 1900. **Figure 2.3** shows the car parking results.

Figure 2.5: Mulberry Lodge (Emsworth) – parking

The results presented in **Figure 2.5** show that the maximum capacity (14 vehicles) was not reached. The maximum number of parked cars on-site during the survey was ten vehicles. This occurred between 0700 and 0900 and 1000 and 1100.

There was no on-street parking observed.

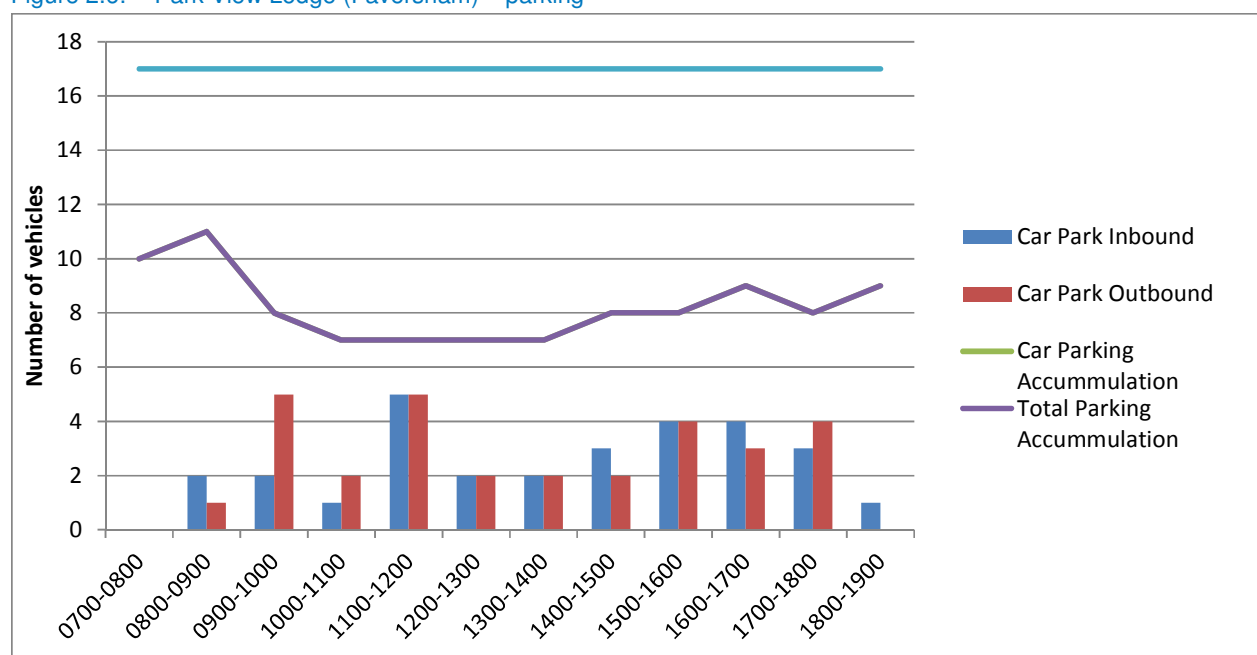

The graph shows that there was steady inbound and outbound vehicle movement throughout the survey period. During the survey period, four light goods vehicles visited the Lodge.

2.2.6 Park View Lodge, Faversham

Located at East Street, Faversham, the CRL website confirms that Park View Lodge has sold all 36 apartments. There are 17 car parking spaces providing a ratio of 0.47 on-site spaces per residential unit.

The surveys were carried out on Tuesday 1st April 2014, 10 cars were recorded parked on the site at 0700 and nine parked cars were recorded at 1900. **Figure 2.6** shows the car parking results.

Figure 2.6: Park View Lodge (Faversham) – parking

The results presented in **Figure 2.6** show that the maximum capacity (17 vehicles) was not reached. The maximum number of parked cars on-site during the survey was 11. This occurred between 0800 and 0900.

There was no on-street parking recorded.

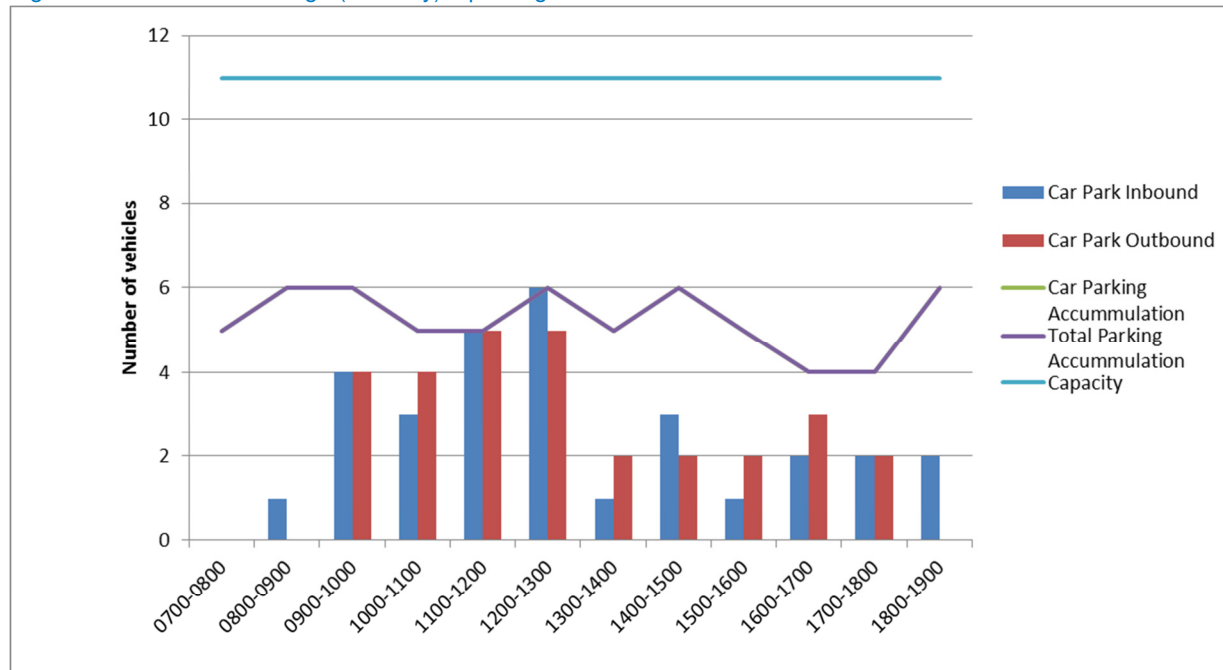

The graph shows that there was steady inbound and outbound vehicle movement throughout the survey period, with two light goods vehicles using the site.

2.2.7 Mottisfont Lodge, Romsey

Located at Alma Road, Romsey, the CRL website confirms that Mottisfont Lodge has sold all 31 apartments. There are 11 car parking spaces providing a ratio of 0.35 on-site spaces per residential unit.

The surveys were carried out on Wednesday 2nd April 2014, five cars were recorded parked on the site at 0700 and six parked cars were recorded at 1900. **Figure 2.6** shows the car parking results.

Figure 2.7: Mottisfont Lodge (Romsey) – parking

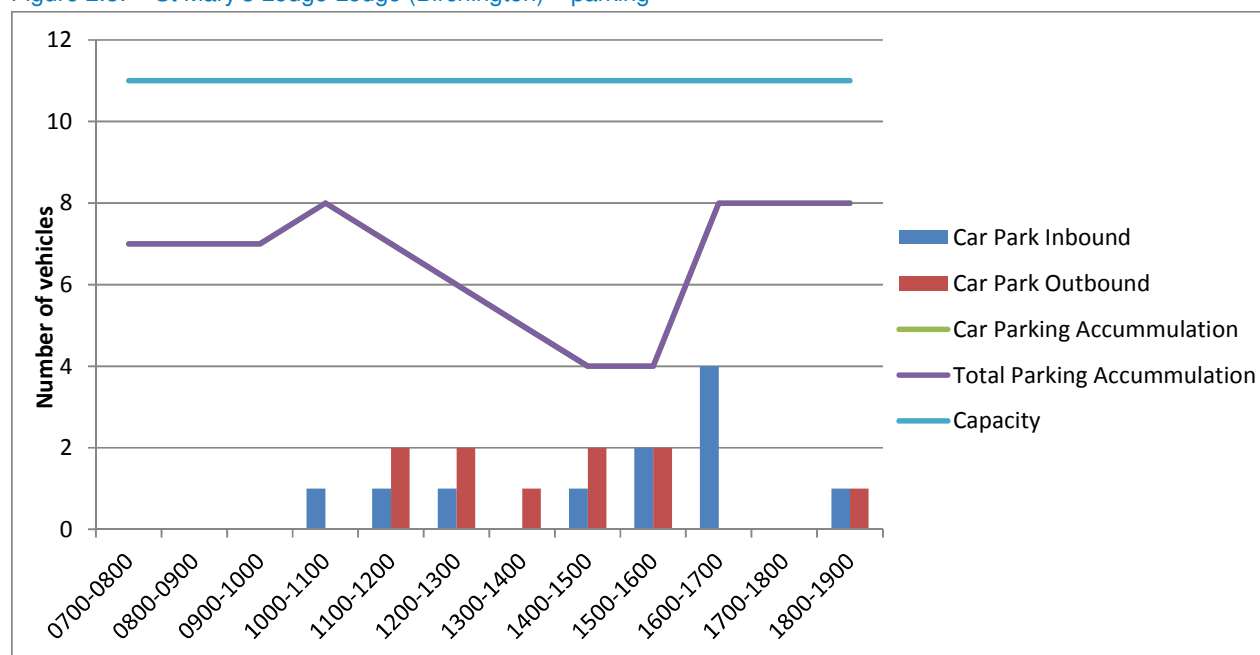

The results presented in **Figure 2.7** show that the maximum capacity (11 vehicles) was not reached. The maximum number of parked cars on-site during the survey was six. Throughout the survey period, there was consistently five to six cars parked on site. During the survey period, no cars associated with the Lodge were parked on-street.

2.2.8 St Mary's Lodge, Birchington

Located at Beach Avenue, Birchington, the CRL website confirms that St Mary's Lodge has sold all 31 apartments. There are 11 car parking spaces providing a ratio of 0.35 on-site spaces per residential unit.

The surveys were carried out on Thursday 3rd April 2014, seven cars were recorded parked on the site at 0700 and eight parked cars were recorded at 1900. **Figure 2.8** shows the car parking results.

Figure 2.8: St Mary's Lodge Lodge (Birchington) – parking

The results presented in **Figure 2.8** show that the maximum capacity (11 vehicles) was not reached. The maximum number of parked cars on-site during the survey was eight.

There was no on-street parking, which is illustrated in the graph by way of the purple line matching the green line.

The graph shows that there was no car park activity between 0700 and 1000, with vehicles leaving the Lodge from 1100 until 1600. Peak inbound flows were between 1600 and 1700, with four cars entering the Lodge car park. On the day of the survey, there were no light goods vehicles using the site.

3 Parking trip rates

The car park surveys have allowed a trip rate for each CRL site to be calculated. The total 12 hour weekday flows (Tuesday, Wednesday or Thursday) recorded between 0700 and 1900 are presented in **Table 3.1**. These values represent total car parking activity associated with each site (including parking within the site and on-street parking).

Table 3.1: Total vehicle movements (on-site car park and on-street)

CRL site/location	Weekday 12 hr Arrivals	Weekday 12 hr Departures	Weekday 12 hr Two Way
Hampton Lodge, Sutton	29	27	56
Lord Roseberry Lodge, Epsom	13	14	27
Churchill Lodge, Lilliput	48	52	100
Mitchell Lodge, Bitterne	30	27	57
Mulberry Lodge, Emsworth	24	26	50
Park View Lodge, Faversham	29	30	59
Mottisfont Lodge, Romsey	30	29	59
St Mary's Lodge, Birchington	11	10	21

Applying the 12 hour flows to the number of residential units, a rate per unit can be determined. The parking rate for each site is shown in **Table 3.2**.

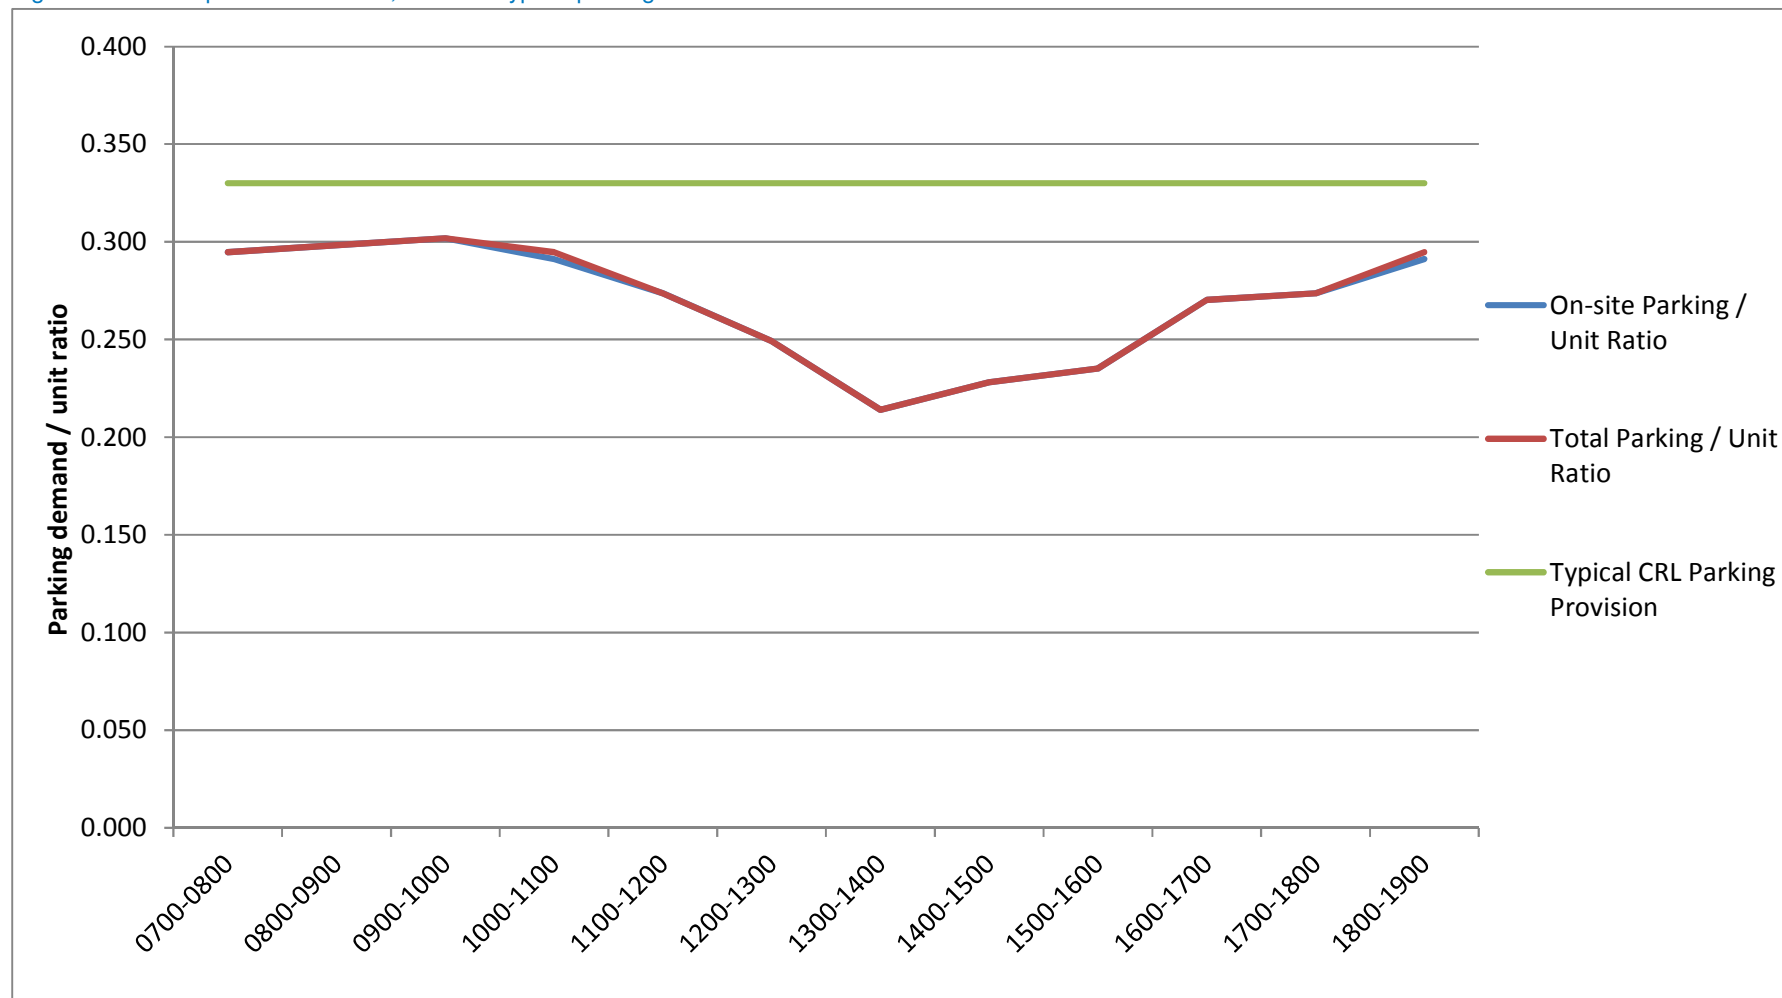

Table 3.2: Total car parking trip rates (per unit)

CRL site/location	Weekday 12 hr Arrivals	Weekday 12 hr Departures	Weekday 12 hr Two Way
Hampton Lodge, Sutton	0.74	0.69	1.44
Lord Roseberry Lodge, Epsom	0.42	0.45	0.87
Churchill Lodge, Lilliput	0.94	1.02	1.96
Mitchell Lodge, Bitterne	0.83	0.75	1.58
Mulberry Lodge, Emsworth	0.80	0.87	1.67
Park View Lodge, Faversham	0.81	0.83	1.64
Mottisfont Lodge, Romsey	0.98	0.97	1.90
St Mary's Lodge, Birchington	0.35	0.32	0.68
CRL Site Average	0.73	0.74	1.47

3.1 Parking trip rates

In order to determine whether the current parking provision is adequate for CRL developments, an average parking accumulation across all eight sites has been identified to highlight an overall trend. Both on-site only and total parking demand results are presented in **Figure 3.1** overleaf.

Figure 3.1: Comparison of on-site, total and typical parking ratio

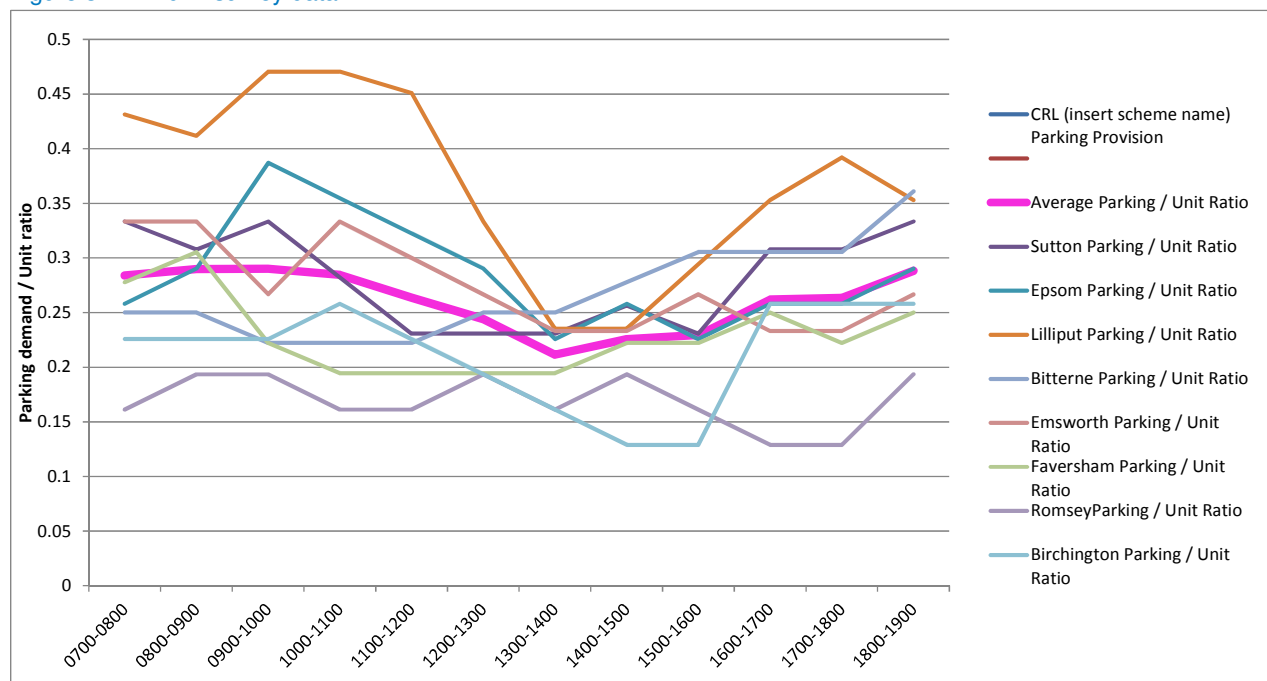

It can be seen that the on-site parking is nearly in line with total parking, indicating that parking on-street, for the eight sites, is not taking place. This would suggest that the parking provision at each of the eight sites surveyed is adequate for the size of development.

It can be seen from **Figure 3.1** that during the 2014 surveys, parking demand across the eight sites was below that of the current CRL parking provision. From the data, the average on-site parking demand is 0.26 spaces per residential unit, and total parking demand, which is the sum of on-site and on-street, is 0.26 spaces per residential unit.

3.2 Comparison of 2012 with 2014

Figure 3.2 provides a graphical illustration of parking demand at each of the eight sites. It can be seen that there is a variation in car parking demand, most notably CRL Lodge in Lilliput (orange line). Despite this, across all sites, parking demand decreases from around 1000 hours, and picks up again around 1400 hours. This is shown more clearly by the 'average parking/unit ratio'; refer to thick pink line.

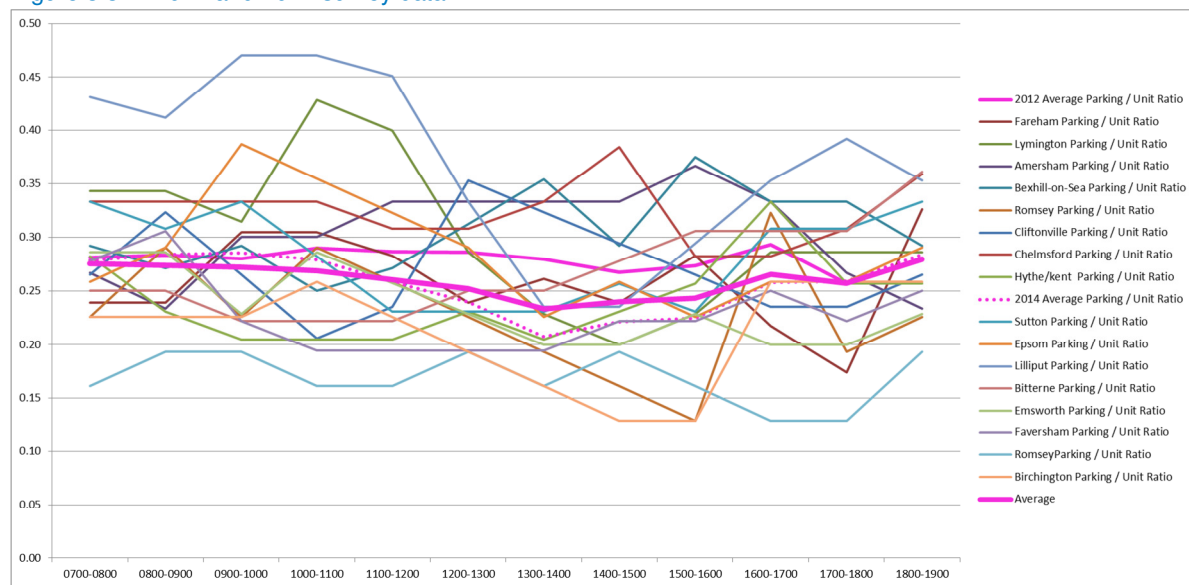

Figure 3.2: 2014 survey data

This data can be compared to the 2012 survey data to see how parking activity has changed. Although the sites are not directly comparable, only one of the sites, Mottisfont Lodge in Romsey has been surveyed both in 2012 and 2014, the two sets of data show that average parking demand has decreased. In **Figure 3.3**, the solid pink line thinner of the two pink lines shows illustrates the 2012 average, the dotted pink line illustrates the 2014 average and the thick pink lines is the average 2012/2014 parking demand. When

comparing the solid pink line to the dotted pink line, it is evident that parking demand has reduced between 1000 and 1700.

Figure 3.3: 2014 and 2014 survey data

The average parking demand in 2012 was 0.28 spaces per residential unit. The 2014 surveys show that the average parking demand is 0.26 spaces per residential unit.

4 Summary

Between Tuesday 18th March and Thursday 3rd April, car park surveys were carried out at eight established CRL Lodge sites. The counts were carried out on neutral days, and provided data on parking activity and the vehicle trip rates associated with each site. Vehicles parked in the immediate vicinity of each Lodge were also counted, recording if any vehicles associated with the Lodge were parking off-site.

A summary of the results is provided in **Table 4.1**.

Table 4.1: Summary of site information and parking rates

CRL site/location	Units	Parking Spaces Available	Parking Spaces Per Unit at the time of the survey	Recorded two-way trip rate
Hampton Lodge, Sutton	39	16	0.41	1.44
Lord Roseberry Lodge, Epsom	31	16	0.52	0.87
Churchill Lodge, Lilliput	51	22	0.43	1.96
Mitchell Lodge, Bitterne	36	12	0.33	1.58
Mulberry Lodge, Emsworth	30	14	0.47	1.67
Park View Lodge, Faversham	36	17	0.47	1.64
Mottisfont Lodge, Romsey	31	11	0.35	1.90
St Mary's Lodge, Birchingdon	31	11	0.35	0.68
CRL Average	36	15	0.42	1.47

In order to account for overall CRL parking demand, an average unit ratio for the eight sites has been calculated. The average parking demand for on-site parking is 0.26, with total parking (on-site and on-street) being 0.26. This ratio is below the current 0.33 spaces per residential unit.

Based on the average parking rate developed from the survey results, the current parking provision could be considered adequate. However, the results demonstrated that there was no “typical” peak in parking demand and the average calculations have tended to flatten the impact of short term parking demand peaks. During the parking surveys, parking was exceeded at two of the eight sites, but only for short periods of time.

It is recommended that the new 2014 survey data is now adopted for use within planning application submissions.
