

I had a look at the amended plans etc... and although no formal survey have been carried out, I am very concerned that the proposal may negatively affect the surrounding area.

In terms of noise from the proposed site, I could not still give you any decent comments as no information has been made available and I have not heard from the developer or his/her consultant. This also applies with the smell suppression system. However looking at the plans (the downward cowl) in the position shown may be trapped at the angle of the building and rise.

Until adequate information is supplied, I would like for this application to be refused.

Should the developer wish to discuss the matter directly with me, please do not hesitate to pass my contact details on. However I understand that you have already informed that developer of this fact.

I hope this helps

Kind regards

Laurent
