Subject: APP/15/00770: E Block, Former BAE Systems, Elettra Avenue, Waterlooville FAO Mrs Sally Smith

Dear Mrs Smith,

APP/15/00770: E Block, Former BAE Systems, Elettra Avenue, Waterlooville: Use of the E block building for leisure (class D2) and/or non food retail (class A1) purposes with associated car parking and other works.

Thank you for your consultation. The site is located on the south west periphery of Waterlooville. Large scale geophysical surveys have been conducted to the south and west of the site which have identified prehistoric field systems to the south and Late Iron Age settlement evidence found to the north west following archaeological trial trenching. Overall therefore the area around the site is one of good archaeological potential. However, the site itself has been extensively impacted by the previous development of the BAE site and therefore any archaeological features and/or deposits which may have been located here will have been removed as at least severely truncated by this development. As a result of these previous impacts I would not wish to raise an archaeological issue in this instance.

Yours sincerely,

Neil J. Adam BA ACIfA
