PRODUCT DESCRIPTION

This premium EcoBrite outdoor LED bulkhead is perfect for lighting up gardens, paths, flats and businesses.

The heavy-gauge aluminium case is produced by die-casting and is finished in an attractive black colour and features an opal polycarbonate diffuser to spread the light evenly.

Lighting is provided by 36 X 0.5W LEDs which consume only 16 watts of electricity but provides a 1700lm output, (equivalent to a 150W incandescent bulb or a 38W 2D fluorescent), meaning that significant savings can be made on your electricity use without compromising lighting performance.

The case is IP65 meaning that it can withstand pretty much anything!

There are 3 options available:

Standard - no sensor

Microwave sensor - turns on automatically with movement

Emergency - 3 hour emergency at 120lm

All LEDsave fittings come with a no quibble **5 Year Warranty** and a **28 Day Money Back Guarantee**.
