

Heritage Statement
For
8 South Street, Havant.

The existing property has been used as a single family dwelling.

The existing extension is in the form of a conservatory of inferior construction. The proposal is to replace it with a traditional brick built extension with a slate roof with two conservation roof lights.

We also wish to demolish the existing outbuilding which is butt jointed to adjacent building.

There will be a conservation roof light introduced to the existing first floor bathroom.

Overall we would suggest that if the consent is granted for the proposed change then it would only serve to enhance the building within the conservation area.
