10 Year Warranty

Why a Lacewing Deluxe Greenhouse?

This Lacewing greenhouse is from our **Deluxe range**, which means it offers you all of the **strength and versatility** of the Classic Lacewing range, with even greater durability and convenience. The Deluxe range features our **sturdiest and most user-friendly** designs yet. This greenhouse can be assembled quickly and easily, and incorporates several new structural elements which make it our **most reliable model**. Our greenhouses offer the flexibility of installing the door to slide to the left or to the right, allowing you the choice of which way you want the door to open. The Deluxe range also features a **10 year warranty** on the high quality toughened glass and a rustproof aluminium frame.

Do I need a base?

We always recommend the use of a base (as shown in the image above). In order to get the most out of your greenhouse, it is essential to invest in a firm, level foundation. This will provide extra stability, anchoring your greenhouse to the ground during bad weather. It will also ensure that the frame sits flat and level, allowing all the parts to fit together as they should. Most importantly, it will help your greenhouse to last for years longer by making it more secure and stable. To purchase our high quality galvanised steel base, please tick the box opposite and add it to your basket.

Benefits of a base

- Provides a ready made, firm foundation for your greenhouse
- Will ensure your greenhouse frame sits as it should, allowing the panels to fit correctly
- Will dramatically extend the life of your greenhouse
- Will act as an anchor for your greenhouse during windy or stormy weather

Greenhouse staging is a highly convenient addition to your greenhouse - it will help to keep everything neat and organised and save precious space. High quality Lacewing greenhouse staging is available as an optional extra in the boxes below. The top shelf of our Essential staging can hold up to 30kg. It is made from galvanised steel, which is durable and strong, yet lightweight and easily portable. Our Traditional staging is made from rustproof aluminium and galvanised steel.

Benefits of greenhouse staging

- Saves precious space, helping you to make the most of your greenhouse
- Helps to keep your plants neat and organised at all times
- Versatile and portable: can be easily repositioned within the greenhouse
- Lacewing staging features slatted shelves, allowing air to circulate around plants and excess water to drain away

Lacewing™ Deluxe Automatic Vent Arm Window Opener / Autovent
£29.99

In Stock
More Info

Selected items will be included with your purchase

Do I need a vent arm?

Ventilation and temperature are highly important factors in maintaining the ideal growing environment in your greenhouse. An automated vent arm is highly useful for any greenhouse owner, as it helps to regulate these factors. This vent arm will automatically open the window when the temperature reaches your desired level, and will close again when the temperature drops. It is adjustable, and doesn't require electricity, which means no running costs.

Benefits of a vent arm

- Allows you to control the environment in your greenhouse even when you're not there
- Adjustable temperature range

Do I need a water butt?

Our Deluxe greenhouses come equipped with a downpipe which is attached to the gutters. In order to collect water for your plants, a water butt can be attached to the bottom of the pipe. See opposite for our selection of water butts and spare downpipe.

Benefits of collecting rainwater

- Convenient, economical method of collecting water for your plants
- Recycling rainwater is environmentally friendly

Optional Extras
