Dear Mrs Lealan,

I am happy to confirm that the WSI forwarded is the one that was discussed with me and I am happy to endorse it to you as meeting the archaeological concerns raised and secured by the archaeological condition. I am aware that these works are in progress onsite and although well advanced is not quite yet completed. Given the advanced stage of the field work and the implication that the additional works that I indicated were also needed to meet the WSI are being implemented, I would not raise any archaeological objection to the discharge of the archaeological condition provided that the planning authority is happy that it can enforce the post field work elements of the WSI (analysis, report writing and dissemination) by reference to the WSI submitted.

Yours sincerely

David Hopkins
