

GLAZING WINDOWS

Our window glazing units come with a 10 year guarantee. Glass options shown are the most common other than clear, but if you want a different finish give us a call to discuss your requirements.

Standard obscure glass is available at the same price as clear factory glazed windows. Ice Effect will be supplied as standard unless specified otherwise. Other options i.e. interlayer white, sand blasted and etched available at extra cost.

Leaded glass is not available for simulated divided lite windows.

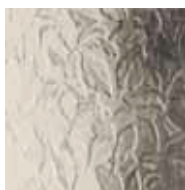

Leaded lights are supplied as standard to match JELD-WEN designs. If you require equal divided designs please specify when ordering.

All bar simulated divided lite designs are supplied with JELD-WEN standard division. If you require equal divided lites please specify at time of order.

* Not available with simulated divided lite design

Bar designs

Simulated divided lite has timber bonded fret bars on the outside and inside with an aluminium integral bar in the glass unit and gives better thermal performance than a traditional divided lite. This is available across the whole window range.

Triple glazed with bars has timber frets inside and outside however no integral bar inside.

Simulated bars double glazed

Simulated bars triple glazed

Spacer bars

Standard Warm Edge spacer bars are supplied in black but grey and white are also available upon request.
