

Good Morning All

This looks a much better scheme and my comments are as follows. There should be a wash basin located nearer to the preparation/cooking area, possibly along with the sink for food prep. Notwithstanding this comment, I have not looked at the layout in any great detail as this information is submitted in connection with the planning application following my concerns raised in connection with the kitchen. The arrangement is an improvement on the previous scheme submitted however it is ultimately the responsibility of the food business operator (care home) to ensure that there are sufficient facilities to allow for the safe preparation and cooking of food with no inherent health and safety issues.

If you require any additional information in connection with this matter, please do not hesitate to contact me.

Regards

Sylvia
