4. Description of the Proposed Development

Please describe the proposed development, including relevant information covering transport and highways impacts of the development; contamination risks on the site; and flooding risks on the site.

The proposed conversion of an existing self contained office suite to a self contained ground floor one bedroomed flat.

There are no know contamination risks associated with this site, the property is late Victorian/Edwardian built as dwellinghouse and more recently used as an office and an upper floor flat. It is in a generally residential area.

The site does not lie within an Environmental Agency Flood Risk Zone.

The site has an existing vehicular access onto London Road. The number of likely car movements to and from the site caused by the change of use from an office use to a single bedroomed dwelling unit is likely to reduce the number of vehicle movements made in and out of the site.

Therefore this change of use will not negatively effect the impact on transport and highways due to reduced vehicle movements.

If the building was not in use immediately before 30th May 2013, when was it last in use? In use at that time Date (DD/MM/YYYY)

What was the use of the building immediately before 30th May 2013 or the last use before that date?

The ground floor of this building, that is the element requested to change under the prior approval regulations has been an office for at least the past 25 years, possibly more. The relevant part of the property is rated as such.
