3. Description of Proposed Works

Please describe the proposed works:

InstaClad Robust - external solid wall insulation to external leaf of external walls (approximate total thickness of install 120mm)
The InstaClad Robust system is installed using mechanical fixings and applying a Turbobox adhesive to the existing walls.
The InstaClad Robust is a medium rise system with a modified silicone resin render finish for high levels of weather protection and longer life than traditional renders. The system uses a high performance grey EPS insulation board.
InstaGroup will not treat or apply any insulation to areas located below ground floor level or damp proof course (DPC) level, and where solid wall insulation system will finish.
This estimate includes for a silicone resin based white rendered finish (please note if you require a different coloured finish, this will be subject to an additional charge. Colour chart can be provided upon request or discussed at technical survey).
This estimate includes for the change of position of the rain water down pipes.
Work to be carried out between the hours of 8am and 5pm Monday to Friday.
It should be noted that solid wall insulation can be a noisy and dusty job; therefore a certain amount of disruption should be expected.
Please note weather conditions will affect the installation duration for the works to be completed.
This estimate allows for the provision of access platforms, with 90% weather proofing.

Has the work already been started without planning permission? ☐ Yes ☒ No
