Good morning David,
I had a look at this application and report a while back and thought I had responded to you
I am sorry for the late reply.

Having had another look at the report from Richard/Sherland, I can confirm that I have no concerns with it.
The current and proposed noise would be within acceptable levels and should not affect residents or businesses. I understand that operation of the generator outside the normal proposed use would be in an emergency or time when the need arises to operate them. Therefore and even during the time of emergency, the noise levels should still remain reasonable.

I have therefore no adverse comment to make.

I hope this helps
again, sorry for the late reply

Kind regards

Laurent

David

I have no adverse comments to make but I am on leave until 2nd June so have asked Laurent to take a look at the acoustic report. I had a quick look at it when I got it late yesterday and didn't spot anything glaringly wrong with it - it was prepared by Richard/Ian Sharland which always inspires confidence. However, as I said I've asked Laurent to take a look and get back to you.

No comments from commercial.

Installation of a generator compound on Harts Farm Way.

Thanks

Kat
