

Dear Mr Eaves,

I have now received images of a further area of excavation at Stoke Farm, Hayling Island.

There is no indication of anything of archaeological interest and therefore I would be happy to advise that it is my opinion that no further archaeological monitoring of these works are necessary and I would raise no objection to the archaeological condition being fully discharged.

Should you have any questions please do not hesitate to contact me.

Yours Sincerely,

Dr Hannah Fluck
Senior Archaeologist
