Our Conservation Roof Window Packages include a roof window, flashing and additional installation products. This will ensure that you have an energy efficient installation.

OPTIONAL GLAZING BARS FOR STANDARD VELUX ROOF WINDOWS

The requirements of conservation officers throughout the country differ and the black finish featured on our conservation packages may not be required in your area.

Consult your local conservation officer to see if you can create a traditional appearance by adding a glazing bar to a standard VELUX Roof Window with grey exterior. This will allow you to take advantage of the full range of window styles and sizes available.

As with our standard conservation packages, a more traditional appearance can also be achieved by installing the window deeper in the roofline with the use of VELUX recessed flashing kits (pages 38–41). Recessed flashing kits also have the advantage of providing greater insulating value for a more energy efficient installation.

TO CREATE YOUR GREY CONSERVATION PACKAGE:

- Select your preferred VELUX Roof Window.
- Choose a flashing kit suitable for your specific roof pitch and roofing material – a recessed flashing kit is recommended (pages 38–41).
- Use VELUX installation products for optimum energy efficiency (pages 36–37).
- Add one or more conservation glazing bars in the corresponding size to your window.

Grey glazing bar to match grey exterior (nearest RAL 7043) finish of all standard VELUX Roof Windows.

VELUX recommend the use of two glazing bars for our wider windows such as SK06, UK04 and UK08.
