Dear Mrs Clark

Re: Planning Application Sign at Emsworth Bowling Club

I enclose our retrospective application for the sign at our club.

I regret that application was not made when the sign was installed, this was due to ignorance on our part due mainly to the fact that the sign is within the boundaries of the club premises. The necessity for permission has only recently come to light whilst dealing with the Council on other matters regarding our lease.

The application has been completed to the best of our ability and within the limits of the skills available among our membership.

The main purpose of the sign is to identify ourselves to local people and help our visitors locate us. We are also keen to attract new members in order that the club may continue for many years and provide a healthy, sociable and gentle sport for the local community.

As we are a relatively small club, with the bulk of our income coming from membership fees, we approached a local firm of solicitors to help with the cost of the sign. This they were kind enough to do and hence their details appear as sponsors.

We hope that the application is received favourably and look forward to hearing the decision.

Yours sincerely,
