

Subject: Purbrook Park School APP

Dear Mr Eaves,

Further to your telephone call this afternoon- we acknowledge your concern that boundary treatment to rear of proposed Bin Store enclosure- north of existing Service Area and Block A- could be improved by the introduction of soft planted screen between bin store fencing and neighbouring boundary. This will require a measure of re-planning to the Bin Store fence line to draw it away from the boundary a sufficient distance to introduce a planting strip.

Given the proximity of tomorrow's target determination date- we would be happy to develop and submit a designed solution to achieve this in response to a Planning Condition.

Kind Regards,
Peter
