Subject: RE: APP/14/01078 - 48 Hart Plain Avenue, Waterloooville

There are 'issues' with drainage at all the runs of back gardens between Waterloooville and Cowplain – as each strip field was developed the drain along the hedgerow was lost (there are a few exceptions where these can still be seen). Water naturally still travels to these locations due to the lie of the land. Without wholesale drainage infrastructure being provided - difficult without trashing literally hundreds of gardens and demolishing some buildings – all that can be done is to mitigate the effects of this historical aberration. It seems the developer has this in hand.

Best wishes
