Observations / Comments:

Good morning Daphney,

I have been asked to comment on discharge of conditions for the above site. I looked at the conditions applied for discharged and found Condition 38 (Dust Suppression) that would require EH comments.

I looked at APP/10/00912 and the current application APP/15/00224. I could not however find any information relating to methods to control the dust or any dust suppression methods within either applications.

I looked on meridio and acolaid against both cases and it may be that the document has not yet been inserted within the system for me to look at and assess. if you have a copy of the suppression document, I should be grateful if you could forward me a copy. Once I have the document, I will endeavour to provide you with comments as soon as possible.

Kind regards

Laurent
