Re: Planning permission for LED Display board at 26-30 London Road, Cowplain PO8 8DL

Please find attached application form for LED display board at said site. The size of LED sign is very small i.e. 95cm X 50 cm and its located at adjacent to the door of the pharmacy under then entrance canopy as seen in attached pictures.

We are late night pharmacy and patients are not aware of late night pharmacy in Cowplain and they have to travel far for their late night prescription requirements. Presence of LED light will make people aware of late night pharmacy open. Following this sign we got really good response and feedback from local residence and people coming from far that they can fill their prescription in late night as they were not aware of any late night pharmacy in area.

Moreover, presence of LED light will make passing patient or community aware of late night (24 hours) pharmacy in area and help get then medication and prescription following their out-of-hours GP visit.

The whole building 26-30 London Road in Cowplain is healthcare provider to patient as on ground floor Pharmacy & GP surgery is located, on first floor Healthspace South- private healthcare provider and 3rd floor Dental practice and out-of-hour GP base is located. So, presence of LED sign will help local community to make aware of healthcare facility available in Cowplain.

I hope you will process our planning application as soon as possible. Meanwhile, if you need more information, please contact me.

Thanking you,

Respectfully,

Yours faithfully,
