Existing Trees

To be retained and protected to BS5837:2012

For details refer to tree survey carried out by tree fabric

Existing Trees

To be Removed

Existing Shrubs/Hedge

To be removed

Proposed Tree Planting

Product: Standard Tree with 2m clear stem

Size/Spec: Refer to plant schedule for details

Supplier: Folia or similar approved

Note: All trees are to be tagged by landscape architect prior to delivery.

Existing Shrubs/Hedge

To be retained

Proposed Native Hedge Planting

Product: Field grown plant stock

Size/Spec: Refer to plant schedule for details

Supplier: Folia or similar approved

Note: All batches of species are to be labelled prior to delivery, all roots are to be protected during transit to prevent roots drying out. Once delivered to site, plants are to be heeled in and planted within five working days.

Proposed Clipped Formal Hedge Planting

Size/Spec: Refer to plant schedule for details

Supplier: Folia or similar approved

Note: All batches of species are to be labelled prior to delivery.

Proposed Ornamental shrub planting

Grass Type 1: Proposed Amenity Grass

Product: A4 Seed Mixture

Supplier: British Seed Housing or similar approved

Note: Seeds are to be sown at a rate of 35-45grams per m2 refer to BSH for details

Grass Type 2: Proposed Meadow

Product: EM2 Meadow Mixture

Supplier: Emorsgate Seeds

Note: Seeds are to be sown at a rate of 4-8grams per m2 refer to Emorsgate for details

All meadow species are to be sown on non-fertile soils

Grass Type 3: Proposed Damp Meadow Grass

Product: EP1 Pond Edge Mixture

Supplier: Emorsgate Seeds

Note: Seeds are to be sown at a rate of 4-8grams per m2 refer to Emorsgate for details

All meadow species are to be sown on non-fertile soils

Proposed mown paths through wildflower meadow grass

A4 Seed Mixture - Proposed Amenity Grass (GRT1)						
A4 is suitable for creating natural grassland landscapes where minimal maintenance is required. It's adaptable to a range of cutting heights making it ideal for whip plantings or left to grow to form an attractive seed head canopy. Wild flower species can also be added to this mixture for increased diversity. For very low nutrient situations ABERACE miniature leaved white clover can be incorporated to provide a free constant supply of nitrogen.

Planting Specification

Proposed Tree Planting

To be planted in the first available planting season after construction as root balled stock. Tree pit dimensions are subject to soil conditions, soil report provided by Agronomist and rootball size. Tree pit sizes are to be agreed with Landscape Architect prior to excavations. All tree pits are to be inspected by the Landscape Architect prior to planting. All tree pits to have irrigation pipe and end cap, 150mm depth aggregate drainage layer with geotextile separation layer and horticultural grade sand to support root ball. Trees within hard landscape areas to have Silvacell tree pit or similar and approved.

- All trees to be supplied by Folia or similar and approved.
- All topsoil to conform to BS 3882:2007 'Multipurpose' or better. The tree pit shall be backfilled with previously prepared topsoil excavated from the pit and additional topsoil as required.
- All backfilled material is to include an organic slow release fertilizer to the N.P.K ratio of 10.0-7.5-10.2 (Vilax Q4HN or similar approved).
- Tree support to be underground anchors to BS 4043: 1989 'Recommendations for Transplanting Root-Balled Trees' for trees in excess of 20cm girth. For trees under this size two untreated softwood stakes at min 7.5cm diameter @ 230 cm length driven into the ground to either side of the rootball, top of stake to min 750mm height above finished soil level. The stem of the tree should be fixed in place with 'Toms' tree ties or similar and approved. Ties and stakes to be checked and adjusted every six months or after periods of strong wind and rain.
- Tree pit root barrier to be installed to all trees within 3m of any underground service route. Barrier material to be agreed. Contractor to confirm locations of all services prior to implementation.

Tree pit size guidelines:

Tree size	Rootball Size	Tree pit size (length, width, depth)
12-14 cmg	40x40cm	70x70x65cm
14-16 cmg	50x50cm	80x80x65cm
16-18 cmg	50x50cm	80x80x65cm
18-20 cmg	60x60cm	80x80x75cm
20-25 cmg	70x60cm	90x90x75cm
25-30 cmg	80x60cm	100x100x75cm

Proposed Hedge Planting

To be planted in a minimum of 300mm depth approved topsoil to BS 3882:2007 'Multipurpose' or better in the first available planting season after construction.

All shrubs are to be planted as container stock unless otherwise specified (5litre), all stock is to be well rooted into the container. All hedge are to be planted in double staggered rows.

All shrubs are to be planted with a slow release organic fertilizer to a N.P.K ratio of 4.5-2.0-7.7+0.8%mg (vilax or similar approved) and backfilled with a mixture of excavated top soil and compost (not peat based). A minimum of 50 mm approved ornamental grade bark mulch is to be applied to planting areas unless stated otherwise.

Proposed Native Planting

To be planted in a minimum of 300mm depth approved topsoil to BS 3882:2007 'Multipurpose' or better in the first available planting season after construction. All shrubs are to be planted as bareroot stock unless otherwise specified.

All shrubs are to be planted with a slow release organic fertilizer to a N.P.K ratio of 4.5-2.0-7.7+0.8%mg (vilax or similar approved) and backfilled with a mixture of excavated top soil and compost (not peat based). A minimum of 50 mm approved ornamental grade bark mulch is to be applied to planting areas unless stated otherwise.

All bareroot stock is to be protected on site to prevent drying out. If delivered stock on site is not planted the same day all bareroot stock is to be heeled in and kept watered.

Planting Guidelines

- All planting and landscape operations should comply with the requirements specified in BS 3936:1992 'Nursery Stock (Part One)' and BS 4428:1998 'Code of Practice for General Landscape Operations (excluding hard surfaces)'. All topsoil and testing to conform to BS 3882:2007 'Specification for Topsoil and Requirements for Use'.
- All topsoil used for planting to be tested by an approved Topsoil Analyst and any required amelioration or soil improvements to be carried out inline with Analyst's report.
- All fertilizers are to be applied or supervised by qualified staff to avoid the action of phytomolysis.

Maintenance Notes - Overview

- All landscaped areas are to be maintained for 12 months or until the plants have established.
- All trees are to be maintained for 36 months.
- All planted areas to be kept clear of weeds at all times throughout maintenance period.
- Planted areas to be forked through regularly to keep soil loose and aerated.
- All litter and debris to be removed from landscaped areas and carted off site.
- Plants pruned as instructed by the Landscape Architect to promote healthy growth and to remove dead and diseased wood.
- Watering as required to maintain healthy growth (allow for 24 N° waterings minimum).
- Any species that dies or fails to establish in the first five years should be replaced by an identical species.
- Allow for a minimum of 24 maintenance visits.

Additional Notes

- Existing levels to be preserved around existing trees and vegetation to be retained.
- Existing trees and vegetation to be retained are to be protected during construction to BS 5837:2012 'Trees in Relation to Design, Demolition and Construction'.
- Any necessary tree works to be carried out by an approved tree surgeon to BS 5837:2010 'Recommendations for Tree Works'.
- All planting in visibility splays should be maintained below 600mm in height.
- For all arboricultural issues refer to survey and reports carried out by other consultants.
- Final location and tree species selection will be subject to service report and foundation depths to be provided by engineers.
- All planting to have adequate rabbit and deer protection.
