Key:

- = Root Protection Area in accordance with BS5837 recommendations.
  - = The crown spread exceeds the recommended RPA – IF the tree has a low branching habit then it may prove necessary to increase the RPA to encompass the full crown or undertake facilitation pruning works.
- N.B. - these options would only be necessary if the tree is to be retained.

As Existing

project:

Caldwell  
Alterations

**Key:**

= Trees which are to be retained and fully protected

= Trees which cannot be accommodated and will be removed to facilitate the layout

= The extent of pruning works required to facilitate the layout
