

David

To clarify the points raised in your email dated 28.7.14

We attach a sketch sectional detail thro' Lighting Bulkhead (A) which will be inserted over the bar counter and independant of the existing beams.

Screen (B) only the non structural screen is to be removed.

It is our clients intention to carry out a full redecoration of the exisitng elevations and scheduled repairs. The colours will match existing and are included within a separate external signage application.

We trust that you will now have sufficient information to determine this application but should you require any furhter infomation please let us know.

Regards

Allan
