

The Domed Lighthouse Bollard Light with Photocell - Ideal for lighting driveways, paths and parking areas, or simply as a stylish garden feature. The fortress is particularly perfect for more high risk areas where damage is more likely to occur, such as gravel drives and areas where garden machinery may be used. Available in a range of heights: 0.6m, 0.8m and 1m, in both 'Garden Green' and 'Graphite Black'. This professional, high quality bollard will look stylish and do its job well in any environment.

This sophisticated and optical design uses a lamp diffuser which gives it the distinctive 'lighthouse' look. Here we use a high quality, UV-stop, polycarbonate lens which protects the lamp, along with a glare resistant aluminium reflector to enhance the light gleaming through the lens.

The extruded aluminium cylinder of the bollard is 2.5mm thick and the base and head are created from heavy duty die-cast aluminium, resulting in a completely rustproof and non-corrosive model. Even the stainless steel screws will remain rust free!

Lumena Pro-Bollards are one of the first Energy Saving Bollard Lights in the UK which use Photocell Technology. The photocell contains an electric light sensor which enables the bollard to function fully without the need to turn the bollard on and off at the mains. The light sensor senses when there is a change in light, automatically switching the lamp on when it gets dark (dusk), and switching it off again at first light (dawn). Not only will this save time having to do this manually each day, but it will also save energy as no energy will be consumed whilst the bollard light is unlit.

If in the unlikely event that damage is caused to your bollard light, spare parts are readily available.

The Newest Generation of Energy Saving Bollard Lighting – Designed for Long Life!

- Height: 1m
- Colour: Graphite Black
- Photocell Technology
- Weatherproof to IP65
- Lampholder: ES / E27 Screw Cap
- Recommended Lamp: Energy Saving GLS ES 11W or Energy Saving GLS ES 15W
- Use Energy Saving Coloured Bulbs for atmospheric effects
- Internal Floor Fixings for that Professional Look
- Instructions included
- 5 Year Guarantee
