Subject: Former Bedhampton Arts Centre, 29 Bedhampton Road, Havant

Good afternoon David,

I hope you are doing well.

I have read the "acoustic reports" and I am not sure where all the numbers are coming from. I see a lot of assumption, assuming but no actual concrete numbers. Did the acoustic consultant visit the site and carried out a survey or got number from somewhere plugged them in a computer?

I am not sure when the assessment was carried out, where it was carried out and by whom etc....

I recall commenting on the redevelopment of the art centre when that came in and the need for acouticals works was then recommended due to trafiic noise from the road. It would appear that this development is closer to the noise source (road) and also tyre place but the noise levels are lower and all should be fine??

I would like to object to this application until an acoustical report has been submitted.

I hope this helps

kind regards

Laurent
