

Access Statement

Lewmar South Factory

23.7.14

- Access to site is via main gate
- Exit from Site is via main gate
- These will not be altered in any way
- Our current vehicular access for commercial lorries remains the same and will not be reduced as this allows articulated lorry turning
- We also have our main offices and North factory on Southmoor Lane with further parking which currently runs at 75% capacity so we also have over flow parking if required.
- Where the temporary structure is to be installed we will be moving the skips and consolidating them behind the gate so they will not alter any of the current parking arrangements.
- This collectively gives us excess capacity for parking in total and also cycle parking which is currently utilised at around 50% of capacity.
