Dear Sir/Madam,

Outline application for provision of Flood Alleviation Storage Ponds and wetland habitat to provide flood alleviation to the Nore Farm Stream and reduce the risk of flooding to Bridge Road in Emsworth at land north of A27 Flood Defence

Thank you for consulting County Planning at Hampshire County Council on the above application (APP/14/00352). As the Minerals and Waste Planning Authority (MWPA) for the borough of Havant, we have the following comments to make.

Our minerals resource data indicates that deposits of commercially valuable sand and gravel potentially lie beneath the proposed site, as well as much of the wider area. However, as this development will not significantly impact the ability to access the underlying mineral resource at a later date, we raise no objection to this application. We would like to see that any suitable excavated mineral generated during the development is utilised in the development in some way, if possible, or alternatively supplied to the aggregates market to ensure that this resource has a beneficial use.

Yours faithfully,

Lewis Smith
Assistant Project Officer

Director of Economy, Transport and Environment
